UNITED STATES DEPARTMENT OF JUSTICE
Immigration and Naturalization Service
Washington 25, D. C.

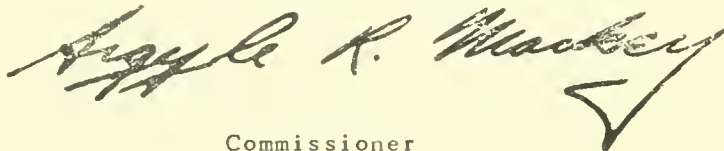

Report of the Commissioner
of Immigration and Naturalization

The Attorney General
United States Department of Justice

Sir: I have the honor to submit the Annual Report of the Immigration and Naturalization Service for the year ending June 30, 1952. The outstanding accomplishments of the Service during the year have been set forth in text and tables as well as some of the more pressing problems.

The report has been assembled under the editorial supervision of Mrs. Helen Eckerson, Chief of the Statistics Branch of the Administrative Division.

Respectfully submitted,

A handwritten signature in dark ink, reading "Reginald R. Mackey". The signature is written in a cursive style with a large, stylized initial "R" and a checkmark-like flourish at the end.

Commissioner

Immigration and Naturalization Service
November 10, 1952

APPENDIX I

JUDICIAL OPINIONS IN LITIGATION AFFECTING THE SERVICE

APPENDIX II

- Table 1. Immigration to the United States: 1820 - 1952
- Table 2. Aliens and citizens admitted and departed, by months.
Years ended June 30, 1951 and 1952
- Table 3. Aliens admitted, by classes under the immigration laws:
Years ended June 30, 1948 to 1952
- Table 4. Immigration by country, for decades: 1820 to 1952
- Table 5. Immigrant aliens admitted and emigrant aliens departed,
by port or district: Years ended June 30, 1948 to 1952
- Table 6. Immigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1952
- Table 6A. Immigrant aliens admitted, by classes under the immigration laws and country of last permanent residence: Year ended June 30, 1952
- Table 6B. Immigrant aliens admitted to the United States under the Displaced Persons Act of 1948, as amended, by classes and country or region of birth: June 25, 1948 to June 30, 1952
- Table 6C. Displaced persons and other immigrant aliens admitted to the United States, by country or region of birth. Year ended June 30, 1952
- Table 7. Annual quotas and quota immigrants admitted. Years ended June 30, 1948 to 1952
- Table 8. Immigrant aliens admitted, by country or region of birth, and major occupation group: Year ended June 30, 1952
- Table 9. Immigrant aliens admitted, by country or region of birth, sex and age: Year ended June 30, 1952
- Table 10. Immigrant aliens admitted, by race, sex and age: Year ended June 30, 1952
- Table 10A. Immigrant aliens admitted and emigrant aliens departed, by sex, age, illiteracy, and major occupation group: Years ended June 30, 1948 to 1952
- Table 10B. Immigrant aliens admitted and emigrant aliens departed, by country or region of birth, sex, and marital status: Year ended June 30, 1952
- Table 11. Aliens and citizens admitted and departed, aliens excluded: Years ended June 30, 1908 to 1952
- Table 12. Immigrant aliens admitted and emigrant aliens departed, by State of intended future or last permanent residence: Years ended June 30, 1948 to 1952
- Table 12A. Displaced persons and other immigrant aliens admitted to the United States by rural and urban area and city: Year ended June 30, 1952
- Table 12B. Immigrant aliens admitted to the United States, by rural and urban area and city: Years ended June 30, 1948 to 1952
- Table 13. Immigrant aliens admitted and emigrant aliens departed, by country of last or intended future permanent residence: Years ended June 30, 1948 to 1952
- Table 13A. Immigrant aliens admitted, by country or region of birth: Years ended June 30, 1943 to 1952

APPENDIX II (Continued)

Table 14. Emigrant aliens departed, by race, sex and age: Year ended June 30, 1952

Table 14A. Emigrant aliens departed, by country or region of birth, and major occupation group: Year ended June 30, 1952

Table 15. Emigrant aliens departed, by country or region of birth, sex, and age: Year ended June 30, 1952

Table 16. Nonimmigrant aliens admitted, by classes under the immigration laws and country or region of birth: Year ended June 30, 1952

Table 17. Nonimmigrant aliens admitted, by classes under the immigration laws and country or region of last permanent residence: Year ended June 30, 1952

Table 18. Nonimmigrant aliens admitted and nonemigrant aliens departed, by country of last or intended future permanent residence: Years ended June 30, 1948 to 1952

Table 19. Nonimmigrant aliens admitted as temporary visitors, transits, students, or treaty traders in the United States, by district: On June 30, 1951 and 1952

Table 20. Aliens excluded from the United States, by cause: Years ended June 30, 1943 to 1952

Table 21. Aliens excluded from the United States, by country or region of birth, and cause: Year ended June 30, 1952

Table 22. Alien crewmen deserted from vessels arrived at American seaports, by nationality and flag of vessel: Year ended June 30, 1952

Table 23. Vessels and airplanes inspected, crewmen examined and stowaways found on arriving vessels, by districts: Years ended June 30, 1951 and 1952

Table 24. Aliens deported, by cause and country to which deported: Year ended June 30, 1952

Table 24A. Aliens deported and aliens departing voluntarily under proceedings: Years ended June 30, 1892 to 1952

Table 25. Inward movement of aliens and citizens over international land boundaries, by State and port: Year ended June 30, 1952

Table 26. Aliens who reported under the Alien Address Program, by selected nationalities, and by rural and urban area and city: During 1951

Table 27. Miscellaneous transactions at land border ports, by districts: Year ended June 30, 1952

Table 28. Inward movement of aliens and citizens over international land boundaries: Years ended June 30, 1928 to 1952

Table 29. Principal activities and accomplishments of Immigration Border Patrol, by districts: Year ended June 30, 1952

Table 30. Passenger travel between the United States and foreign countries, by port of arrival or departure: Year ended June 30, 1952

Table 30A. Passenger travel between the United States and foreign countries, by country of embarkation and debarkation, class of travel and nationality of carrier: Year ended June 30, 1952

Table 31. Passenger travel to the United States from foreign countries, by country of embarkation: Year ended June 30, 1952

Table 32. Passenger travel from the United States to foreign countries, by country of debarkation: Year ended June 30, 1952

APPENDIX II (Continued)

Table 33. Alien passengers arrived in the United States from foreign countries, by port of arrival and country of embarkation: Year ended June 30, 1952

Table 34. Alien passengers departed from the United States to foreign countries, by port of departure and country of debarkation: Year ended June 30, 1952

Table 35. Citizen passengers arrived in the United States from foreign countries, by port of arrival and country of embarkation: Year ended June 30, 1952

Table 36. Citizen passengers departed from the United States to foreign countries, by port of departure and country of debarkation: Year ended June 30, 1952

Table 37. Declarations of intention filed, petitions for naturalization filed, and persons naturalized: Years ended June 30, 1907 to 1952

Table 38. Persons naturalized, by classes under the nationality laws and country or region of former allegiance: Year ended June 30, 1952

Table 39. Persons naturalized, by country or region of former allegiance: Years ended June 30, 1943 to 1952

Table 40. Persons naturalized, by country or region of former allegiance and major occupation group: Year ended June 30, 1952

Table 41. Petitions for naturalization denied, by reasons for denial. Years ended June 30, 1948 to 1952

Table 42. Persons naturalized, by sex and marital status with comparative percent of total: Years ended June 30, 1944 to 1952

Table 43. Persons naturalized, by sex and age: Years ended June 30, 1944 to 1952

Table 44. Persons naturalized, by States and territories of residence: Years ended June 30, 1948 to 1952

Table 45. Persons naturalized, by specified countries of former allegiance and by rural and urban area and city: Year ended June 30, 1952

Table 46. Persons naturalized, by country or region of birth and year of entry: Year ended June 30, 1952

Table 46A. Persons naturalized, by country or region of birth and country or region of former allegiance: Year ended June 30, 1952

Table 47. Persons naturalized, by statutory provisions for naturalization: Years ended June 30, 1948 to 1952

Table 48. Writs of Habeas Corpus in exclusion and deportation cases: Years ended June 30, 1943 to 1952

Table 49. Prosecutions for immigration and nationality violations: Years ended June 30, 1943 to 1952

INTRODUCTION

The development of Immigration and nationality policy of the United States has necessarily been closely associated with our economic, political, and social history. As these varied threads of history have become inextricably intertwined, so, too, have the responsibilities of the Immigration and Naturalization Service become varied, complex, and difficult. In short-term perspective the conspicuous and distinctive motivations for the year ended June 30, 1952, seemed to be: a quickened sense of accountability for law enforcement to insure protection from subversive and other illegal alien elements; an urgency to administer the immigration and nationality laws with the equity and consideration that befits a Government agency in a country that has so recently assumed world leadership, and a girding for the overhauling of the regulatory and administrative machinery of the Service for the implementation of the all-inclusive Immigration and Nationality Act of June 27, 1952.

A reorganization, planned for greater efficiency, was put into effect during the year. The reorganization was undertaken because the experience gained in administering the Internal Security Act of 1950 indicated a need for change. Also, the decentralization of many adjudicative functions to districts and the change in appeals procedures made some changes desirable. Anticipation of new procedures to implement the new Immigration and Nationality Act that becomes effective on December 24, 1952, also pointed to some need for reorganization.

The Operations Advisors group, under the Deputy Commissioner, was enlarged so that close liaison between the field offices and the Central Office could be more readily maintained. The Personnel Office was placed directly under the Deputy Commissioner, and certain personnel actions were delegated to the district directors.

For better administration, the enforcement work was divided between an Assistant Commissioner for Investigations and an Assistant

Commissioner for Border Patrol, Detention, and Deportations. Much of the adjudicative work formerly done in the Central Office has been transferred to the field offices in the past two years. In addition, jurisdiction over cases formerly appealable to the Adjudications Division in the Central Office, with a further right of appeal to the Board of Immigration Appeals, was conferred exclusively on the Board of Immigration Appeals. Therefore, the former Adjudications Division became the Inspections and Examinations Division, with personnel responsible for enunciation of Service policy and dissemination of Board opinions, so that changing trends and policies may be rapidly relayed to the field offices. New emphasis was placed on citizenship education in the Citizenship Services and Instructions Division; and the Statistics Branch, with certain added research functions, was placed in the Administrative Division.

Possibly the most emphasized function of the year was that of enforcement, because the mounting international tensions made national security of first importance. Investigators, border patrolmen, immigrant inspectors, and security officers used every means at their command to ferret out and apprehend and deport subversive aliens in the United States, or to exclude from the United States any such aliens seeking entry.

Each year since the end of World War II has seen more and more alien immigrants, tourists, crewmen, border crossers, as well as United States citizens, arriving at our land, sea, and air ports, seeking admission. There they must be examined by our immigrant inspectors. Last year there were more than 107 million entries. More than half of those who were admitted were citizens, and of the 52,852,677 alien admissions, 97 percent were repeated entries of border crossers at the Canadian and Mexican borders.

There were 265,520 aliens admitted who were immigrants admitted for permanent residence. Not since 1929 have so many immigrants been admitted in a single year. The high number is due, in part, to the admission of ethnic Germans and displaced persons, and also to the increasing number of immigrants from Western Hemisphere nonquota countries, and the number of wives of citizens who are coming largely from the countries where United States military forces and civilians are stationed.

The country continued to import woodsmen and potato diggers from Canada, asparagus pickers from the West Indies, and cotton pickers and other agricultural laborers from Mexico. In total about 235,000 temporary workers were brought into the United States, either under special legislation or under the discretionary powers of the Attorney General.

In addition to the aliens who entered the United States legally, there were many others who wished to come in who could not legally enter for various reasons. The smuggling and stowaway methods of entry of aliens continued to be a lucrative, nefarious business.

To be sure, the attractiveness of the appeal to enter varies. It may mean fleeing from persecution by a European who cannot obtain a quota number, or it may mean seeking an undocumented entry in order to carry on the schemes of a foreign agent; or it may be a way to earn a better living than can be obtained in Mexico; or it may mean trying to escape the conditions in the Orient which have increased the desire of thousands of Chinese persons to find a haven in some other part of the world. Whatever the motivation, the means used to try to enter were numerous.

Two men were discovered crossing from Canada to Buffalo in the trunk of a car. Five others carved for themselves a two-room suite out of a cork cargo from Portugal; another, assisted by a deck steward, travelled first class in a deck chair; others are flown from Cuba or Mexico to little-used airfields where they are picked up by organized groups of taxi drivers and driven north, and, of course, many others from Mexico use the traditional "wetback" method of crossing the Rio Grande. Subversives, criminals, narcotic law violators, smuggled aliens, other illegal entrants, in that order of precedence, were sought out for expulsion from the country or prosecution.

Some measure of the accomplishments in law enforcement is in the number of deportations and voluntary departures. Following World War II, deportations averaged about 18,000 a year. During 1950 and 1951, the number was lower, because the Service, in an effort to combat the enormous Mexican illegal entry problem, adopted the policy of granting voluntary departure in as many cases as possible. In the fiscal year 1952 the number of deportations again equaled 20,181, while the number of those permitted to depart reached the astronomical figure of 703,778.

The 31 aliens deported and 148 aliens excluded as subversives tell only a small part of the story of investigations and hearings necessary to bring about the desired result of ridding the country of subversive aliens. Smuggling, which has become an all too lucrative and well ordered business in recent years, continued to be a serious problem, and the volume of Mexican illegal entries continued to be a major problem.

While, undoubtedly, the internal security and enforcement programs have taken precedence over all other programs in the past year, the Service has, in a very different sense, had another program of security -- that of naturalization. Part of the assimilative process of aliens into our democracy lies in their entering into and accepting the duties and responsibilities of citizenship.

In the fiscal year 1952, it was evident that many of the new immigrants who have come to this country since the war, were becoming naturalized as soon as the residence requirements were fulfilled. The number of naturalization certificates granted was 88,655, an increase of 62 percent since last year.

Part of the citizenship education program has been the active participation of members of this Service in the "I Am An American Day" programs. During the past year a new emphasis was placed on this celebration of citizenship when Congress, by Joint Resolution, approved February 29, 1952, designated September 17 of each year to be celebrated as "Citizenship Day", in commemoration of the signing of the Constitution on September 17, 1787. The observance of this day will give all citizens, native-born and naturalized, an opportunity of dedicating themselves to the principles of democracy.

This report would not be complete without mention of the representatives of the Central Office and the field offices who have worked with the Congressional Committees to give technical advice in the drafting of the Immigration and Nationality Act of 1952, and who now are using their knowledge and skill in the monumental task of readying the Service for the operation of the new Act when its provisions become effective on December 24, 1952.

LEGISLATION AND LITIGATION

The Service, through the office of the General Counsel, drafted or approved 3,989 legislative reports expressing the views of the Service on both public and private bills during the fiscal year, as compared with 2,108 such reports during the previous fiscal year. Other legislative work of that office included the drafting of 56 items of proposed legislation, the same number as in the preceding year.

Public Laws.—The major legislative project of the fiscal year continued to be the work begun early in 1950 on omnibus bills having for their purpose the recodification, and in many particulars the revision, of existing laws relating to immigration, naturalization and nationality. These bills culminated in H. R. 5678, 82nd Congress, which was enacted over the President's veto on June 27, 1952, and became Public Law 414. The Service and other representatives of the Department of Justice continued active cooperation with those engaged in Congressional Committee work by giving technical advice on this omnibus legislation, in various conferences, draft revisions, reports and other tasks. Public Law 414 was undoubtedly the most important legislative product of the fiscal year just closed. Its real impact upon the Service functions will not be felt until well into the current year. Its enactment just three days before the close of the fiscal year would in any event have left it very little time to affect the operations of that year. Moreover, with one exception, its provisions will not go into effect until December 24, 1952. The work of drafting the necessary regulations and instructions to implement the Act, of construing and interpreting its many new provisions, are necessarily the agenda of the current year. And of course the full weight of the Act will not be manifest until it has been in effect for some time.

Anticipation of the enactment of the omnibus bill undoubtedly had an inhibiting effect insofar as concerned Congressional action on many other public measures relating to Service functions.

Consideration of bills dealing with various phases of immigration and naturalization was deferred because the general omnibus bill was looked upon as likely to render separate public enactments unnecessary.

Other public laws introduced in the 82nd Congress relating to or affecting the work of the Service and enacted during the year included the Act of July 12, 1951 (Public Law 78), amending the Agricultural Act of 1949; the Act of October 19, 1951 (Public Law 181), terminating the state of war between the United States and Germany; the Act of March 20, 1952 (Public Law 283), creating a penalty for harboring or concealing illegally entered aliens, and making it a criminal offense to transport certain illegally entered aliens with knowledge of such status; the Act of April 9, 1952 (Public Law 307), making special quota immigration visas available to certain alien sheepherders; the Act of June 18, 1952 (Public Law 395), facilitating the acquisition of detention facilities.

Private bills introduced and enacted --The number of private laws dealing with immigration and naturalization matters enacted during the fiscal year was 477, compared with 354 enacted during the previous fiscal year, 202 during the fiscal year 1950, 23 during the fiscal year 1949, and 117 during the fiscal year 1948. The total number of private bills introduced during the past fiscal year was 2,008, of which 1,369 were introduced in the House and 639 in the Senate. As pointed out in the last annual report, comparatively few private bills are enacted into laws, the average as to prior years being less than ten percent. In the fiscal year of 1951, the proportion rose to almost 17 percent. The upward trend continued during the past fiscal year and the number of private laws then enacted -- 477 -- was over 24 percent of the 2,008 private bills introduced in the same period.

Whether or not bills are enacted into law, their introduction results in many requests upon the Service for reports to the Congressional Committees concerned. High priority is given to such cases in the field investigations required as a basis for such reports. Thus the growing number of bills introduced in each Congress becomes an increasing burden on the investigative force of the Service. This adds correspondingly to the work of the General Counsel's office in preparing reports and in appearances by representatives of his office at hearings or proceedings upon many of such bills before Congressional Committees.

Litigation.--The Internal Security Act of 1950, which amended the Act of October 16, 1918, made criminal prosecutions a more valuable weapon of enforcement in subversive, alien registration, and other types of cases. Public Law 283, making it an offense to transport illegally entered aliens, also added to the types of cases to be prosecuted

As in previous years, the great bulk of the litigation was in the Federal District Courts. Many of the decisions there were appealed to the various United States Courts of Appeals and there was a continuing trend by the parties adversely affected by the appellate decisions to seek review by the United States Supreme Court.

During the past fiscal year, the Supreme Court announced its decisions in the following cases, which either arose out of Service activities or involved statutes administered by this Service: Bindczyck v. Finucane, 342 U.S. 76; U.S. ex rel. Jaegeler v. Carusi, 342 U.S. 347; Carlson et al. v. Landon, 342 U.S. 524; Harisiades v. Shaughnessy, 342 U.S. 580; Acheson v. Okimura, 342 U.S. 899; Acheson v. Murata, 342 U.S. 900; United States v. Spector, 343 U.S. 169; and Kawakita v. United States, 343 U.S. 717.

Other actions by the Supreme Court during the fiscal year included the denial of certiorari in the cases of Greene et al. v. United States, 342 U.S. 813; Abo et al. v. McGrath, Aoki v. Barber, McGrath v. Abo, and Barber v. Aoki, 342 U.S. 832; Kuniyuki v. Acheson, 342 U.S. 942; Machado v. McGrath, 342 U.S. 948; Sineiro v. United States, 343 U.S. 904; and denial of bail in U.S. ex rel. Young v. Shaughnessy, 343 U.S. 913.

The Supreme Court granted certiorari in the following cases, which were continued to the 1952 - 1953 calendar: Gordon v. Heikkinen, 343 U.S. 903; Chew v. Colding, 343 U.S. 933; Mandoli v. Acheson, 343 U.S. 976. Other cases filed with the court for consideration and continued to the 1952 - 1953 term include

Yanish v. Barber, petition for certiorari to the Court of Appeals, Ninth Circuit, to review -- F. 2d --; Lutwack v. United States, petition for certiorari to the Court of Appeals, Seventh Circuit, to review 195 F. 2d 748; Revedin v. Acheson, petition for certiorari to the Court of Appeals, Second Circuit, to review 194 F. 2d 482; Shaughnessy v. Mezei, petition for certiorari to the Court of Appeals, Second Circuit, to review 195 F. 2d 964; Martinez v. Neelly, petition for certiorari to the Court of Appeals, Seventh Circuit, to review 197 F. 2d 462; and Wohlmuth v. Acheson, petition for certiorari to the Court of Appeals, District of Columbia Circuit to review 196 F. 2d 866.

Of the many issues disposed of during the fiscal year by the Supreme Court or pending before it for disposition in the ensuing year, some mention must be made of the high lights. In the Harisiades case, supra, the Supreme Court at long last passed upon and sustained the constitutionality of the deportation provisions of the Act of October 16, 1918, as amended, which make former membership in the Communist Party in the United States grounds for deportation. This has been one of the chief weapons of the Service in the struggle against subversive aliens. Of comparable importance, the Carlson case, supra, confirmed the power granted by Section 23 of the Internal Security Act of 1950 to detain without bail aliens in deportation proceedings who are currently active adherents of Communism and who are likely to aid in carrying out the objectives of the world Communist movement. The Spector decision, supra, sustained against a charge of unconstitutionality for vagueness the penal provisions of Section 23, of the Internal Security Act of 1950, which require aliens ordered deported as subversive to cooperate in obtaining the travel documents prerequisite to deportation. Cumulatively, these three decisions are of monumental importance in the battle against subversion, since they make possible the effective use of the legislation Congress has designed for that purpose.

Other important issues relating to subversive aliens are raised in the cases which the Supreme Court will consider at its next term. The Heikkinen case raises anew the question of the Attorney General's power to detain an alien Communist without bail during pendency of deportation proceedings. The Chew case questions the power to exclude subversive aliens without hearing on the basis of confidential information (hitherto sustained in Knauff v. Shaughnessy, 338 U.S. 537) when applied to a returning resident. The Mezei case involves the power to restrain from entering the United States by continued detention at the port of arrival if necessary such an excluded alien whom allegedly no other country will accept. In addition to raising a question as to judicial review of deportation orders under Section 10 of the Administrative Procedure Act, the Martinez case involves the adequacy of the evidence of the proscribed nature of the Communist Party in a deportation proceeding under the Act of October 16, 1918, as amended.

Questions of expatriation also loomed large in the cases before the Supreme Court. Among the cases passed upon by the court during the last fiscal year, such questions were involved in the Okimura, Murata, Kawakita, Abo, Aoki, and Kuniyuki cases. Expatriation is also in issue in the Mandoli, Wohlmuth and Revedin cases, which will be before the court at its next term.

Comparable issues, and many more, were before the Courts of Appeal and District Courts in Service litigation during the past fiscal year. A reference to some of the reported opinions, which are listed in the Appendix, should give a clear idea of the growing volume of litigated cases affecting the Service.

One of the effective deterrents to smuggling and kindred offenses is successful criminal prosecution. Prosecutions are generally instituted by complaint filed with the United States Commissioner, by indictment, or presentment of a grand jury, or by information filed by the United States Attorney.

During the fiscal year ended June 30, 1952, prosecutions were instituted in 14,164 cases involving immigration matters and 557 cases involving nationality matters. Such prosecutions resulted in a total of 13,809 court convictions during the year, with an aggregate imprisonment of 3,284 years and fines aggregating \$96,677.

Ninety-one percent of the total convictions last year were made under Sections 1 and 2 of the Act of March 4, 1929, for illegal entry. Convictions resulted in 495 cases for violation of nationality matters, chiefly under Section 911 of Title 18, United States Code, for false representation as a citizen of the United States. There were 2,294 smuggled aliens involved in these cases. Most of the convictions were under Section 8 of the Act of February 5, 1917, as amended by Public Law 283 of March 20, 1952.

There were presented to United States Attorneys for prosecution under the Internal Security Act the cases of 76 aliens ordered deported who wilfully refused or failed to show diligent effort to depart within six months after notice. This number included 68 criminal, narcotic and immoral cases and eight subversive cases. Aliens involved in these cases are of the most undesirable type, and every effort is made to see that these cases are presented for prosecution as promptly as possible after the expiration of the six month period.

The chart which follows shows a sharp rise in the number of convictions in the past fiscal years:

Writs of Habeas Corpus.—The institution of habeas corpus actions as a means of delaying deportation presents a continuing problem to the Service. Writs of habeas corpus may be granted in the Federal Courts to determine the legality of the detention of aliens in the custody of immigration officers. In the fiscal year 1952, 62 writs of habeas corpus involving exclusion and 337 writs involving deportation were served by the United States Marshals upon immigration officers for release of aliens in their custody. A total of 386 cases were acted upon by the Federal Courts, 67 cases involving exclusion and 319 involving deportation. In 30 of the cases, the courts sustained the writ and ordered discharge of the persons from the custody of the Service. The writs of habeas corpus were dismissed in 253 cases and in 103 cases the applications for writs of habeas corpus were withdrawn.

IMMIGRATION AND EMIGRATION

Year by year the problems of inspection at our land and sea-ports become more involved, and the job of our immigrant inspectors becomes one requiring almost super-human qualities of wisdom and judgment. In the first place, much of the direction of Communist movements is in the hands of aliens, therefore, great care must be exercised to see that no alien enters the United States whose presence could be inimical to the interests of the democratic principles of this country. On the other hand, to best serve a democracy, the immigration laws must be administered so that no person who meets the legal requirements to entry is denied such entry. Secondly, inspections must be conducted in such a manner as to foster good international fellowship with our neighboring and overseas countries. Again, care must be exercised in the admission of visitors, because, despite the fact that the great majority of students, visitors, and other temporarily admitted aliens depart at the expiration of their authorized stay, those who do remain create enforcement problems. The cases of many overstayed persons come to light when the alien himself reports and simultaneously applies for suspension of deportation following marriage to an American citizen. And, finally, the importance of individual inspection must not be overshadowed by the sheer volume of inspections confronting a small force of inspectors.

After immigrant inspectors have examined aliens seeking admission, those refused admission have, in most instances, the right of appeal.

By regulations published in the Federal Register on May 24, 1952, effective the same day, jurisdiction over cases formerly appealable to the Commissioner, with a further right of appeal to the Board of Immigration Appeals by an aggrieved party, was conferred exclusively to the Board of Immigration Appeals. The saving of time in arriving at a final determination of a case by the elimination of double appeals was expected to redound to the benefit of the government and the subject of the proceedings. In the short time

during which the procedure has been in effect, this expectation has been realized.

Another benefit of this procedure was to free much needed personnel from the burden of individual case review and enabled them to devote time and attention to the pressing, but previously neglected policy and management problems. These include the dissemination of information on policies and trends as indicated by the Board of Immigration Appeals decisions, and the general supervision of inspections procedures to insure uniformity in the application of immigration laws.

During the past year, two changes of particular interest in the field of inspections took place. Our headquarters in Europe in connection with the Displaced Persons Act were closed, and our difficult and complex share in the processing of over three hundred thousand displaced persons in a mass migration to the United States was finished. On June 16, 1952, following a survey of three months by Service personnel, an office was established in Agana, Guam, and the enforcement of the immigration laws of the United States, formerly the responsibility of the Navy and Interior Departments, came under the jurisdiction of the Immigration and Naturalization Service.

Since the end of World War II, the number of entries of aliens and citizens into the United States goes up and up in the millions. More than doubling the World War II figure, the volume during the past year has for the first time passed the 100 million mark to reach 107 million. As may be seen from the table that follows, the greatest increase was in Canadian and Mexican land border traffic.

Aliens and Citizens arrived and examined at
U. S. Ports of Entry during years
ended June 30, 1951 and 1952

	Year ended June 30, 1952		
	Total	Aliens	Citizens
Total	107,084,527	52,852,677	54,231,850
Arrived at land borders	103,712,099	51,129,442	52,582,657
Canadian	44,212,088	20,898,541	23,313,547
Mexican	59,500,011	30,230,601	29,269,410
Crewmen	1,939,418	1,087,633	851,785
Arrived at seaports	1,433,010	635,902	797,108
	Year ended June 30, 1951		
	Total	Aliens	Citizens
Total	95,396,519	46,102,008	49,294,511
Arrived at land borders	92,400,356	44,620,000	47,780,356
Canadian	41,341,410	18,680,987	22,660,423
Mexican	51,058,946	25,939,023	25,119,923
Crewmen	1,713,998	949,535	764,463
Arrived at seaports	1,282,165	532,463	749,702

Travel across the Mexican Border has been in recent years from 25 to 35 percent higher than traffic over the Canadian Border. Canadian traffic has increased, however, seven percent since last year, the major increase being in alien land border traffic.

It is anticipated that Canadian border traffic will continue to increase in view of the beginning of a large industrial and national resources expansion period in Canada and the building of new roads. Some of the new industries will soon be in operation adjacent to the international border and will attract many of the European aliens who have recently arrived in Canada. These workers will, no doubt, want to visit the United States. The increase in traffic has presented greater problems in inspection and enforcement.

Crewmen

The authority given the Immigration and Naturalization Service, by Section 20 of the Immigration Act of 1924, to examine alien crewmen was further confirmed on March 17, 1952, by the United States Court of Appeals for the Second Circuit in the case of U. S. Lines v. Shaughnessy, (195 F. 2d 385). The court dismissed the complaint filed in an action in which the transportation line sought a judgment declaring that alien seamen signed on in the United States for round trip voyages were not subject to inspection on return to United States ports and could not be detained on board vessels on which they arrived.

During the fiscal year 1952, 62,179 vessels and 97,886 airplanes were inspected on arrival. The number of airplane inspections has more than doubled since the end of World War II. The 1,939,418 inspections of crewmen on arrival in the past year represent a 13 percent increase since 1951, and include 1,087,633 aliens and 851,785 citizens. The excluding provisions of the Internal Security Act, of course, applied to crewmen as well as to other aliens. Temporary admission under the Ninth Proviso was authorized in the cases of 571

alien crewmen whose membership in proscribed organizations was found, after investigation, to have been involuntary.

Records indicate that 3,021 alien crewmen deserted from vessels at American seaports. Four hundred sixty-eight were Italian, 450 British, 308 Norwegian, 207 Greek, 201 Netherlandish, 193 Chinese, and 182 Spanish.

Immigrants

Immigration, an important source of population growth prior to 1930, is affected to a large extent by political, social, and economic events both in this country and abroad. In the 30's and early 40's restrictive legislation, depression, and World War II reduced immigration to an insignificant factor. However, the arrival of war brides and displaced persons under special legislation has reversed this trend during the years since World War II. In this fiscal year, the number of aliens admitted for legal permanent residence rose to 265,520, which represents the highest figure since 1929. The rise was due chiefly to the admission of 42,786 ethnic Germans under Section 12 of the Displaced Persons Act of 1948, as amended, as well as a 45 percent increase in nonquota immigration.

Displaced Persons.--The major provisions of the Displaced Persons Program, which reached its peak in the fiscal year 1950, expired in December 1951, and the program was nearly completed at the close of the fiscal year. The chief objectives of the law may be said to have been accomplished, since out of a maximum number of 400,744 visas authorized under the law, a total of 393,542 visas were used. In the next few months an additional 1,300 ethnic Germans may be admitted

since the maximum number of 54,744 ethnic German visas were issued by June 30, 1952, and 53,448 were actually admitted by that time.

During the past fiscal year 79,178 displaced persons, including 1,963 adopted and other orphans, were admitted to this country, which brought the total number of displaced persons admissions under the Act (exclusive of ethnic Germans) to 340,094. In addition, the cases of 3,308 displaced persons in the United States had been submitted to Congress for adjustment of their immigration status under the provisions of Section 4 of the Displaced Persons Act.

The maximum number of visas authorized and the number of immigrants admitted are shown in the following table.

Maximum visas authorized and immigrant aliens admitted
to the United States, by classes under Displaced
Persons Act of 1948, as amended:
June 25, 1948 - June 30, 1952

Class of admission	Maximum number of visas authorized	Total number admitted thru June 30, 1952
Total all classes.....		<u>393,542</u>

Greece.....	9,851	9,849	2
Other countries	17,614	14,676	2,938

1/ Includes wives and children.

Most of the 79,178 displaced persons came in under the occupational preference within the quotas. This preference gave advantage to 78 percent of the quota displaced persons in 1952. In 1951, 88 percent had first preference.

	<u>Years ended June 30,</u>	
	<u>1952</u>	<u>1951</u>
Total.....	<u>79,178</u>	<u>96,515</u>
Quota.....	<u>77,196</u>	<u>95,920</u>
<u>First preference quota</u>	60,034	84,136
(Persons who are farm, household, construction, clothing and garment workers, and others with special training and professional qualifications, and their wives and children)		
<u>Second preference quota</u>	15	340
(Blood relatives of citizens or resident aliens of the United States, and their wives and children)		
<u>Non-preference quota</u>		
Section 2.....	44	250
Section 3.....	17,103	11,194
Nonquota.....	<u>1,982</u>	<u>595</u>
Displaced orphans.....	1,963	571
Other nonquota.....	19	24

The effect of the provisions of the Displaced Persons Act, which authorized the mortgaging of 25 percent of the respective quotas for the fiscal years 1951 to 1954, and 50 percent of the quotas for the years thereafter, will be felt far into the future. Immigration will be curtailed for many years from a number of Southern and Eastern European countries, such as Estonia, Latvia, and Lithuania, with small quotas which have been heavily mortgaged.

Other quota immigrants.--The following table shows that the admission of ethnic Germans constituted the principal factor in the rise in quota immigration. The number of displaced persons declined 20 per cent since last year:

Quota immigrants admitted
Years ended June 30, 1951 and 1952

	<u>1952</u>	<u>1951</u>
Total.....	<u>194,247</u>	<u>156,547</u>
<u>First preference quota</u>		
Relatives of citizens.....	5,335	5,002
Skilled agriculturists.....	649	445
<u>Second preference quota</u>		
Wives and children of resident aliens	4,447	4,029
<u>Nonpreference quota.....</u>	<u>106,620</u>	<u>51,151</u>
Ethnic Germans.....	42,786	2,040
Other nonpreference quota.....	63,834	49,111
Displaced persons admitted under the Displaced Persons Act of 1948, as amended.....	77,196	95,920

The annual established quota for 1952 was 154,277. Nevertheless, under the mortgaging provisions of the Displaced Persons Act of 1948,

as amended, quota immigration reached 194,247. With the exception of Germany, Northern and Western European quota immigration has been little affected by the Displaced Persons Program. Indicative of the continued drawing power of the United States as an immigrant receiving country is the fact that Denmark, France, Iceland, Luxembourg, Netherlands, and Norway have practically filled their quotas. Great Britain and Northern Ireland used less than one-third of its quota and Ireland used only 21 percent. Finland and Portugal, which were not affected by the Displaced Persons Program, filled seven-eighths of their respective quotas.

Most of the Southern and Eastern quotas were oversubscribed due to the admission of displaced persons and ethnic Germans. The quota of Spain was oversubscribed last year because of the admission of 115 sheep herders, under the Act of June 30, 1950, which provided for the relief of the sheep-raising industry by making 250 special quota visas available for certain sheep herders for one year. This law was extended for another year, by the Act of April 9, 1952 (Public Law 307).

Nonquota immigrants.--When Congress limited immigration by means of quotas, it also provided for certain classes of aliens who could be admitted without regard to quotas. The nonquota immigrants may be roughly divided into three groups -- (1) geographic -- natives of the independent countries of the Western Hemisphere; (2) professional -- ministers and teachers; and (3) wives, children, and, in some instances, husbands of United States citizens.

Nonquota Immigration rose 45 percent last fiscal year largely because of the greater number of wives of citizens and natives of non-quota countries admitted.

A comparison of the classes of nonquota immigrant admissions for the past two years is shown below:

Nonquota immigrants admitted in Years ended June 30, 1951 and 1952		
	1952	1951
Total nonquota immigrants.....	71,273	49,170
Natives of nonquota countries and their wives and children.....	48,408	35,274
Husbands, wives, children of citizens.....	19,315	11,462
Ministers, their wives and children.....	580	733
Professors, their wives and children.....	297	457
Other nonquota immigrants.....	2,673	1,244

The number of wives of citizens admitted almost doubled. It is of interest that over three-fifths of the wives of citizens admitted in the fiscal year 1952 came from three countries occupied by United States troops: Germany, Italy and Japan. Most of the 4,220 wives of

citizens from Japan were admitted under special legislation which was passed to permit the admission of war brides racially ineligible for admission.

<u>Country of birth</u>	<u>Number of wives of citizens</u>					
	<u>1952</u>	<u>1951</u>	<u>1950</u>	<u>1949</u>	<u>1948</u>	<u>1947</u>
Great Britain and Northern Ireland.....	208	148	241	914	1,843	7,160
Germany.....	3,768	2,042	3,798	10,130	3,638	701
Italy.....	1,799	1,534	2,168	3,081	6,385	5,711
China.....	959	826	1,062	2,143	3,192	902
Japan.....	4,220	125	9	445	298	14
Australia & New Zealand.....	157	159	184	286	852	2,225

Nonquota immigration from Western Hemisphere countries rose 36 percent since last year and was the highest since 1930. Principal countries of origin were Canada, with 58 percent, and Mexico with 20 percent.

Nonimmigrants

Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. The figures below do not include such special groups as agricultural laborers, border crossers, and crewmen.

Nonimmigrants admitted Years ended June 30, 1950-1952

	<u>1952</u>	<u>1951</u>	<u>1950</u>
Total nonimmigrants admitted.....	<u>516,082</u>	<u>465,106</u>	<u>426,837</u>
Government officials.....	22,267	20,881	13,975
Members of international organizations.....	5,137	5,526	5,010
Temporary visitors for business.....	86,745	83,995	67,984
Temporary visitors for pleasure.....	269,606	230,210	219,810
In transit.....	77,899	72,027	68,640
Returning residents.....	44,980	44,212	40,903
Students.....	8,613	7,355	9,744
Treaty traders.....	791	850	766
Other nonimmigrants.....	44	50	5

For the past six years nonimmigrant arrivals have exceeded, in each year, such arrivals in any single year since the first records of 1908. The 11 percent rise in the fiscal year 1952 reflected chiefly increases in temporary visitors, transits, and foreign government officials.

The principal countries from which nonimmigrants came are shown below:

<u>Country or regions of birth</u>	<u>Number of nonimmigrants</u>	
	<u>1952</u>	<u>1951</u>
All countries.....	516,082	465,106
Canada.....	87,623	78,581
West Indies.....	82,855	79,613
England, Scotland, and Wales.....	66,730	59,119
South America.....	41,385	39,317
Mexico.....	32,120	28,060
Asia.....	27,404	22,845
France.....	18,427	16,419
Germany.....	17,268	12,670
Central America.....	13,189	11,462
Netherlands.....	11,212	10,307
Spain.....	10,382	9,602
Italy.....	10,042	9,764
Other countries.....	97,445	87,347

Government officials.--With the exception of the fiscal year 1944, the 22,267 government officials admitted in the fiscal year 1952 represents the highest figure since the passage of the Immigration Act of 1924. The number of European government officials declined slightly since last year, and the number from Asia and Mexico nearly doubled.

Visitors.--A thirteen percent rise in the number of temporary visitors was the most important factor in the larger number of nonimmigrants during the past year. Possibly the reduced tourist rate for European air travel was a contributing factor in increasing the number of visitors. Pleasure travel from Great Britain, France, Germany, Poland, and Spain increased 23 percent since last year. Canadian tourist travel was larger by 18 percent and Mexican travel rose 25 percent.

As of June 30, 1952, there were 104,198 visitors in the United States; 39,050 in the New York District; 15,191 in the Miami District; 12,287 in the San Antonio District, with smaller numbers in other districts.

Students.--The number of student admissions increased by 1,258 during the past year, chiefly from Asia, Mexico, and the West Indies, and South America. On June 30, 1952, there were 25,705 students in the United States.

Students in the United States by District

Exercise of the Ninth Proviso

Aliens, except Agricultural Laborers.--Under the terms of the Ninth Proviso to Section 3 of the Immigration Act of 1917, the Attorney General is permitted in his discretion to admit, for temporary periods, certain persons who otherwise are inadmissible to the United States.

Applications for exercise of Ninth Proviso 1/
Years ended June 30, 1948 - 1952

Year ended June 30,	Number of applications	Disposition		Number of persons involved
		Admission authorized	Admission denied	
Total..	20,741	19,990	751	128,435
1952..	2,208	2,036	172	41,493
1951..	15,904	15,733	171	47,871
1950..	1,068	886	182	11,916
1949..	933	784	149	21,146
1948..	628	551	77	6,009

1/ Exclusive of Mexican agricultural laborers

As shown in the table above, in the fiscal year 1952, the number of applications for exercise of the Ninth Proviso dropped to 2,208 from a total of 15,904 in 1951. In 1951, many aliens whose membership in Communist or totalitarian organizations was purely nominal, were found excludable under the Internal Security Act and later admitted temporarily under the Ninth Proviso. Included in the 1951 figures were 12,778 alien seamen and many aliens applying for permanent residence who were temporarily admitted under the Ninth Proviso pending clarification of their status under the Internal Security Act. When Public Law 14 clarified the meaning of "membership", it was found that in most cases, membership of the alien seamen in subversive or totalitarian groups was either when the seaman was under 16 years of age, or involuntary by operation of law, or for purposes of obtaining employment. These seamen were found admissible under the provisions of Public Law 14 and it was unnecessary to exercise the Ninth Proviso in such cases.

The applicants sought the exercise of the Ninth Proviso in 1,129 cases as temporary visitors for business or pleasure, to receive medical treatment, to visit relatives, attend school or conventions, or as contract laborers. Applications were received in the past year to import, or for extension of authority to import 39,731 contract laborers. In 82 cases the applications were for border crossing privileges; in 43 cases for transits; in 586 cases for seamen and in 368 cases for extension of temporary stay to continue medical treatment, extension of border crossing privileges, etc.

Agricultural laborers admitted under Public Law 78 and Ninth Proviso.--Included among those admitted through the exercise of the Ninth Proviso were unskilled agricultural and industrial laborers who would be subject to exclusion from the United States as contract laborers. Before importation is authorized, a showing is required that there is a need for the labor, that prevailing wage rates in the areas of employment will be paid, and that American labor will not be displaced by the aliens imported.

In the past fiscal year 11,430 agricultural laborers were

admitted under the Ninth Proviso from Canada, the Bahamas, Jamaica, Barbados, Honduras, Leeward Islands, Trinidad, and British Guiana, and 345 illegal entrants were contracted. During the year, 8,945 of these laborers returned home, and the cases of 2,180 were closed for other reasons. On June 30, 1952, there remained 13,584 of these laborers still in the United States.

Until the passage of Public Law 78, on July 12, 1951, Mexican agricultural laborers were admitted under the Ninth Proviso. At the beginning of the fiscal year, there were 83,447 Mexican agricultural laborers in the United States, and an additional 4,467 were admitted in July under the Ninth Proviso prior to passage of the law. Public Law 78 set up a new program for recruitment of agricultural workers from Mexico. The law provided for the establishment of reception centers at or near places of entry, and included provisions for transportation, subsistence and other details with respect to Mexican laborers in accordance with the Migrant Labor Agreement with Mexico of 1951. While the task of recruitment and management of the Mexican worker program was placed with the Department of Labor, the responsibility for entry and departure control under the immigration laws applying to all aliens remained with the Immigration and Naturalization Service.

The recruitment of Mexican agricultural workers under Public Law 78 was initiated toward the end of July 1951, and took on momentum during the months of September and October when 47,582 and 57,270 laborers, respectively, were admitted from Mexico through the reception centers. The importation of Mexican laborers dropped during the winter months and began to pick up again in May. In June, 12,184 such laborers were admitted through the reception centers. During the entire fiscal year, 219,074 Mexican agricultural laborers were admitted to the United States under Public Law 78, including 184,560 admitted through reception centers, 23,099 laborers previously employed under the Ninth Proviso and extended or recontracted under Public Law 78, and transfers from other Districts. The table below shows the total number of admissions and Mexican laborers illegally in the United States who were contracted in pursuance to the agreement with Mexico of August 11, 1949.

Mexican agricultural laborers admitted and contracted Years ended June 30, 1950-1952			
	1952	1951	1950
Total number	223,541	115,742	116,052
Under Ninth Proviso	4,467	115,742	116,052
Admitted to the United States	4,467	2,116	19,833
Illegal entrants contracted	-	3,626	96,239
Under Public Law 78	219,074	-	-

At the close of the fiscal year there was a total of 124,454 agricultural laborers in the United States. The countries from whence they came were as follows:

<u>Country of last permanent residence</u>	<u>Number in U. S. on June 30, 1952</u>
Total	<u>124,454</u>
Canada	352
Mexico (admitted under P. L. 78)	89,916
(admitted under Ninth Proviso)	20,954
Bahamas	4,286
Jamaica	5,722
Barbados	1,461
Leeward and Windward Islands	1,233
Trinidad	187
British Guiana	181
British Honduras	<u>162</u>

Canadian woodsmen.--The program of permitting importation of skilled Canadian woodsmen under bond to guarantee maintenance of status and departure was continued in effect during the year. The processing of these workers, especially woodsmen, throws a heavy burden on our inspectors at the several control ports. There was a time when once the workers were in the United States, they remained for the season and required little work after the first entry was recorded. In recent years, however, it is not unusual for hundreds of these workers to return to their homes and families every weekend. Since they are required to surrender their woodsmen cards upon departure, much time and labor is expended every time they come back into the United States.

They generally travel in groups and it is not unusual for two hundred, or more, of these workers to apply for reentry in one day and the control ports are not staffed to handle that kind of work along with the regular run of traffic.

Petitions for Immigration Visas and Reentry Permits

While in most instances the applications for admission to the United States are handled by the State Department, in two instances at least, the initial application is initiated through our Service. For the past two and one-half years the authority to pass on these applications has been delegated to the District Director in the various districts.

Petitions for immigration visas.--The Immigration Act of 1924 provides that nonquota or preference-quota status may be granted to certain near relatives of citizens of the United States. In order to obtain such status, the United States citizen must file with this Service a petition for the issuance of an immigration visa (Form I-133) accompanied by proof of his citizenship, his relationship to the beneficiary, and other facts. If, after examination, the petition is approved, it is forwarded to the Department of State for transmittal

to the appropriate American consulates. American forces stationed in Germany, Italy, and Japan were also the large number of visa petitions filed during the fiscal year 1952. After they were married in foreign countries they applied for American visas for their alien wives. During the year just ended, 70,514 new visa petitions were received; of that number 25,782 visa petitions were approved, 784 were rejected, and 24 approvals were revoked.

Reentry permits.--Section 10 of the Immigration Act of 1924 provides that resident aliens who have been lawfully admitted for permanent residence who depart for a temporary visit abroad may obtain reentry permits to facilitate their re-admission to the United States. The years since the end of the war have shown a steady increase in the number to apply for documents with which to travel outside the United States. The travel to European countries in particular has shown a large increase.

During the fiscal year of 1952 a total of 66,243 applications for these reentry permits were received and of this number 63,695 were approved and issued, and at the end of the year 2,034 applications were pending. Almost half the reentry permits were issued in New York.

Extensions of reentry permits were granted in 13,208 cases in 1952 as compared with 12,245 during the previous fiscal year. Sixty applications for extensions were denied. There were pending at the close of the year, 352 applications for extensions of reentry permits.

Emigrants and Nonemigrants

Emigrants --Emigrants are, by definition, aliens who depart from the United States after residence of a year or more in the United States, with the intention of remaining abroad. It will be seen from this definition that emigrant, therefore, is not the opposite of immigrant in all cases, since some aliens admitted as nonimmigrants on arrival may depart after a year or more and be classed as emigrants.

The number of emigrants declined to 21,880 in the fiscal year 1952, from 26,174 in the previous year. The principal countries to which they went are shown in the following table

Number of emigrants departed by country of intended future residence Year ended June 30, 1952			
Country of future residence	Number of emigrants	Country of future residence	Number of emigrants
Total	21,880	Asia	2,441
Europe	9,691	China	223
Denmark	350	India	210
France	1,172	Israel	228
Germany	1,028	Japan	506
Greece	435	Philippines	521
Ireland	229	Other Asia	753
Italy	1,281	North America	6,722
Netherlands	327	Canada	2,760
Norway	553	Mexico	988
Spain	225	West Indies	2,227
Sweden	334	Central America	576
Switzerland	341	Other North America	171
United Kingdom	2,248	South America	1,984
Other Europe	1,168	Africa	317
		Australia & N Zealand	456
		Other countries	269

Nonemigrants --Nonemigrants are temporary visitors leaving the country after a stay of less than a year, or resident aliens who are leaving for a temporary visit abroad

During the year ended June 30, 1952, 487,617 nonemigrants departed from the United States. There were 49,972 alien residents who departed for temporary residence abroad. Two treaty traders had return permits. The remainder, 437,643, entered as tourists, transits, government officials, and others who were leaving the United States after stays of a few days to a year's duration.

ADJUSTMENT OF STATUS

Immigration laws have become increasingly restrictive. Inevitably, such laws on occasion impose undue hardship on aliens. Parents of citizens and other aliens with close ties in this country are often the sufferers of such restrictions. To ameliorate these situations, there are certain provisions in the law and regulations.

Suspension of Deportation

Section 19(c) of the Immigration Act of 1917, as amended, provides that the Attorney General may suspend the deportation of an alien who is deportable under law other than one who is deportable on charges relating to subversives, criminals, narcotics, immoral persons, and the mentally and physically deficient, if the Attorney General finds (1) that such deportation would result in a serious economic detriment to a citizen or legally resident alien who is the spouse, parent, or minor child of the deportable alien, or (2) that such alien was residing continuously in the United States for seven years or more, and was residing in this country on July 1, 1948. In addition to the 194,247 quota immigrants admitted from abroad during the past fiscal year, there were 1,780 aliens who became legal permanent residents through suspension of deportation under the provisions of Section 19(c) of the Immigration Act of 1917, as amended, and for whom a quota charge was made in the fiscal year 1952. Charges to the quotas of the following countries were made for these aliens by the Department of State for the year ended June 30, 1952:

Quota allotments in suspension of

of State

Section 19(c) of the Immigration Act of 1917, requires that the pertinent facts in all cases in which the suspension of deportation is proposed shall be reported to Congress with the reasons for such action. If during the session at which a case is reported or in the next following session Congress approves by concurrent resolution the granting of suspension to the alien, deportation proceedings are thereafter cancelled and the alien is accorded the status of a lawful permanent resident of the United States. If the Congress does not pass such a resolution, the Attorney General is directed to deport the alien in the manner provided by law.

During the fiscal year 1952, 7,300 suspension cases were submitted to Congress. Congress approved 2,899 cases during the fiscal year.

Displaced Persons residing in the United States

Section 4 of the Displaced Persons Act of 1948, as amended, provides that 15,000 eligible displaced persons (as defined in that Act) temporarily residing in the United States may apply to the Attorney General for adjustment of their immigration status to that of permanent residents, provided that they are otherwise admissible to the

United States and were lawfully admitted to the United States as nonimmigrants under Section 3, or as students under Section 4(e) of the Immigration Act of 1924. Final approval rests with Congress under a procedure similar to that for suspension cases.

Those who file applications for adjustment of their immigration status are required to establish by credible evidence that they have been displaced as a result of events occurring subsequent to the outbreak on September 1, 1939, of World War II. They must prove that they cannot return to their native countries, nor to the countries of last residence or nationality, because of persecution or fear of persecution on account of race, religion, or political opinions.

By June 30, 1952, 11,610 applications had been received for adjustment of status under Section 4 of the Displaced Persons Act of 1948, as amended. There have been 3,308 cases approved by the Commissioner and submitted to Congress, and 1,230 cases approved by Congress. Most of those who had their status adjusted had been admitted as students, visitors, or seamen.

The grounds for denial of adjustment of immigration status under Section 4 in the fiscal year 1952, fall into the following categories:

Total number.....	<u>405</u>
Not unable to return to country of birth, residence, or nationality; no apparent persecution due to race, religion, or political opinion.....	200
Cause for displacement did not arise from events occasioned by and sub- sequent to outbreak of World War II.....	12
Not a lawful entry under Section 3 or Section 4(e) of the Immigration Act of 1924.....	103
Inadmissible to the United States.....	49
Found haven in another country.....	32
Entered subsequent to April 1, 1949.....	9

Preexamination

Preexamination is a privilege accorded to certain aliens who are in the United States in a status other than that for permanent residence. They wish to adjust their immigration status by going to Canada

to apply to an American consul in that country for an immigration visa with which to apply to the United States for permanent residence.

If the application for preexamination is approved, the alien is given a hearing to determine his admissibility to the United States. The alien must be admissible to Canada, of good moral character, and have assurance from the American consul in Canada that an immigration visa can be issued promptly. If the alien is found to be eligible for an immigration visa he is issued a pre-examination border-crossing card to facilitate entry into Canada. During the year, 904 new applications for preexamination were submitted by aliens who were not subject to deportation proceedings; 1,855 applications for preexamination were approved, 272 were denied; and the authority for preexamination was revoked in the cases of 12 individuals. In the preceding year, 1,945 new applications for pre-examination were received.

Exercise of Seventh Proviso

Aliens returning after a temporary absence to an unrelinquished domicile in the United States of seven consecutive years may be admitted by the Attorney General under the authority contained in the 7th Proviso to Section 3 of the Immigration Act of 1917, notwithstanding a ground or grounds of inadmissibility under the immigration laws. (However, it is to be noted that the Internal Security Act of 1950 contains a prohibition that the 7th Proviso shall have no application to cases falling within the purview of Section 1 of the Act of October 16, 1918, as amended.)

The table which follows shows the number of applications for consideration under the 7th Proviso finally disposed of during the past five years and the manner of disposition of such applications.

Applications for exercise of Seventh Proviso			
Years ended June 30 1948-1952			
Years ended June 30,	Number of applications	Disposition of applications Admission authorized	Admission denied
Total	1,039	98	121
1952	145	130	15
1951	140	121	19
1950	172	138	34
1949	334	306	28
1948	248	223	25

Most of the applications for Seventh Proviso relief during the past fiscal year arose in deportation or preexamination proceedings of resident aliens who would have been excludable criminals or mental or physical defectives, or illiterates. Practically all of the 130 cases

in which favorable action was taken represented persons who, in addition to having the statutory requisite of seven years prior domicile in the United States, had established family ties in this country and had otherwise unblemished records for years past. Grounds waived in order to authorize readmission were: 21 physical or mental defects, 87 criminals, 13 unable to read, and nine other excludable classes.

Registry of aliens under Section 328(b) of the
Nationality Act of 1940.

To obtain a reentry permit, to be naturalized, and for various other reasons, aliens need to have proof of lawful permanent entry into the United States. After the alien's record of entry is verified, a certificate of arrival or other appropriate document is issued by this Service.

An alien may make application to the Commissioner of Immigration and Naturalization for the creation of a record of lawful entry where no record exists of his admission for permanent residence. To be eligible to have a record of registry created, the alien must prove that he is eligible for citizenship, that he entered the United States prior to July 1, 1924, and has resided here continuously since, that he is a person of good moral character, and that he is not subject to deportation. When registry is approved a record is created establishing the alien's admission for permanent residence as of the date of his entry. During the past year, 5,464 applications for registry were received, and 4,136 records of registry completed.

DEPORTATION,

DETENTION AND

BORDER PATROL

The ever expanding problems of internal security made a division of functions and responsibility within the Service a logical step toward greater security protection, and faster detention and apprehension of aliens whose presence may be inimical to the best interests of the country.

Thus the work was divided into two major divisions: i.e., Investigations Division, and Border Patrol, Detention and Deportation Division.

Deportations and Voluntary Departures

The final objective of all enforcement work of the Service is to rid the country of aliens who under the immigration and nationality laws have no legal right to be here, either because they came in illegally, or having made a legal entrance, have failed to meet legal requirements for remaining. To this end investigations are made, the borders are patrolled, detention quarters are maintained and aliens, who cannot be immediately deported, are placed on supervised parole. Since the measure of achievement of enforcement is deportation and voluntary departures, this chapter will report first on the accomplishments. This will be followed by the methods whereby they are achieved.

Year by year since World War II, the volume of aliens deported or required to depart has multiplied, largely because of the spreading encroachment of Mexican illegal entrants into rural and industrial areas in the United States. It is these illegal entrants who swell the volume, particularly of voluntary departures. In the fiscal year 1952, the total reached 723,959, an increase of five percent over last year.

(1) Deportations.--Deportations effected--When a warrant of deportation has been executed, aliens who depart either through deportation at the expense of the Government, or who depart at their own expense are included in deportation statistics. Following the World War II, deportations averaged about 18,000 until 1950 when the number dropped to 6,628. In the fiscal year 1951, however, the number more than doubled to reach 13,544, and during 1952 there was a further increase to 20,181.

In 1950 and 1951 formal deportations of Mexican aliens were limited to those of the criminal and immoral classes or to those who had previously been granted four voluntary departures. This largely accounts for the small numbers of deportations effected.

Contrary to the procedure outlined above, the Service, in so far as the limitations of funds and personnel permits, is now deporting Mexican illegal entrants. This is because deportation is known to be a better deterrent to a quick attempt at return than is voluntary departure.

The following tables are indicative of the changed policies. It will be noted that there are increases in deportations to practically all geographic areas, but most of the increase is to Mexico. Note, too, that the cause for deportation that increased most was "entered without proper documents." Of the 13,342 who entered illegally, 11,042 were deported to Mexico.

Aliens deported from the United States by country
or region to which deported
Years ended June 30, 1949 - 1952

Likely to become public charges.....	24	14	38	20
Subversive or anarchistic.....	31	18	6	4
Miscellaneous.....	377	160	109	149

The effect of the Internal Security Act is indicated in the continued increase in the number under subversive charges who were deported or who departed with warrants of deportation outstanding. Eight of these subversive classes and 68 of the criminal, narcotic or immoral classes, a total of 76 cases, were presented to United States Attorneys for prosecution as having willfully refused or failed to show diligent effort to depart within six months after notification of the provisions of Sec. 20(c) of the Act of 1917, as amended by the Internal Security Act.

(2) Voluntary Departures.--Of the total of 703,778 who were permitted to depart, warrants of arrest were issued in 9,578 cases. In many cases the usual hearings required for deportation were held, the essential difference being that the decision was to grant the privilege of departure in lieu of deportation prior to the issuance of a warrant of deportation. In most of the cases however, where warrants of arrest were issued, many man-hours of the hearings procedure were eliminated by the granting of the departure privilege early in the proceedings.

In the other 694,200 cases in which warrants of arrest were not issued, the procedure is to obtain a statement from the alien showing illegal presence in the United States, and a request for privilege of departure. This streamlined procedure, in use almost exclusively on the Mexican Border, accomplished the expelling of many more aliens than could have been effected under the formal deportation procedure, but it was far from a solution of the problem of the illegal entrants from Mexico.

(3) Outstanding Warrants of Deportation.--At the close of the fiscal year, there were outstanding 8,505 unexecuted warrants of deportation. Of these, 3,183 had been outstanding six months or less, and 5,322 had been outstanding more than six months, some for years.

Total number.....	8,505
Deferred for reconsideration or stay.....	493
Deferred account introduction private bills.....	357
Awaiting travel documents.....	3,612
Awaiting transportation.....	529
Serving sentence:	
Travel document available.....	673
Travel document not available.....	149
In hospital or asylum:	
Waiting travel document or transportation.....	279
Travel document obtainable, unable to travel.....	111
Travel document not available.....	270
Travel document not available:	
At large.....	940
Whereabouts unknown.....	741
Travel document obtainable, whereabouts unknown.....	351

All but the first group of cases shown above are unexecuted for reasons beyond Service control.

The continuing increase in the number of private bills is shown in another section of this report. Those awaiting travel documents or completion of transportation arrangements represent both the normal lag between the issuance of final order and actual deportation, and also, the increasing number of cases in which transportation arrangements cannot be completed because of the war situa-

tion in the Far East. Other delays are occasioned by the fact that some aliens are destined to areas where transportation facilities for deportees are scant. This difficulty can sometimes be surmounted by the assembling of groups and deporting by chartered plane when the relative expense favors that operation, or by arranging for transshipment enroute.

Changes in territorial jurisdiction, strict expatriation laws, and inability to establish birth as claimed or other evidence of nationality, are the usual causes for Service inability to obtain travel documents, and few reversals are anticipated of previous refusals to accept as deportees.

Of the 2,100 cases in which the Service has been unable to obtain travel documents, 270 are in hospitals or asylums, mostly at State expense, and 149 aliens are serving sentences in penal institutions. Many of these aliens would be available for deportation if documents could be obtained. Practically all of these aliens on discharge from the institutions are subject to the penalties of the Internal Security Act if they willfully fail or refuse to depart. Many of the 940 reported as at large are also subject to those same penalties and a comparatively few are unable to travel. The 741 reported as "whereabouts unknown" have not been brought under the supervision provisions of the Internal Security Act.

(4) Transportation of Deportees. --For overseas transportation, the Service was able to deport 276 aliens on the vessels of the Military Sea Transport Service; 115 to Germany, 49 to England, 58 to Italy, 31 to the Philippines, and 23 to other countries. Last year, the Office of Chief of Transportation issued 694 authorizations, but the Port Authorities supplied only the 276 spaces mentioned. Efforts to overcome this situation are being made on pro rata share of operations cost on passenger-miles basis. The total cost last year was \$22,640.53 - an average of \$82.03 each, substantially less than by commercial carrier.

The most noteworthy deportation by commercial vessels was in May 1952 when 183 departed on a vessel for Naples. These deportees to the Mediterranean, Middle Eastern and Far Eastern countries were transshipped at Naples to their destinations, 85 being sent by chartered planes to Pakistan.

Transportation to border ports for deportation continued by air-coach when practicable, but the number moved by train and by Service busses greatly exceeded this number. Emphasis is placed on the reduction of over-all expense by the use of the most economical means of transportation concomitant with the best use to be made of escort personnel, and to decreased detention.

The coordination of these parties sometimes becomes quite involved. For example, an alien at Seattle for deportation to Miami is transferred to San Francisco for re-transfer to New York for

re-transfer to Miami. From Seattle he may travel with deportees on their way to Mexico. From San Francisco he may be with deportees who will leave Chicago for deportation through Detroit to Canada. The New York-Miami transfer would be with deportees previously assembled at Ellis Island from the Great Lakes and North Atlantic Coast areas for deportation through Miami. This series of actions must be timed to reach New York in time for a specified sailing date and the reverse movements are also coordinated to the greatest extent possible to assure the most economical utilization of service personnel.

(5) Acceptance of Deportees by other Countries.--Under the Internal Security Act, deportation shall be to the country specified by the alien, if that country will accept him. Those countries to which the aliens had no previous ties usually decline to accept them as deportees. Since January 1951, Canada has accepted but one of the 729 non-Canadians, and Mexico has not accepted any of the 35 persons of other than Mexican nationality who specified Mexico, in the past five months.

The number of cases continues to increase which are referred through the Department of State to home authorities for final decision because consular representatives in this country have refused to issue travel documents. In 63 cases the consuls were instructed to issue the documents, and in 61 others their adverse decisions were sustained. There were 597 such cases pending at the close of the fiscal year as compared to 431 at the close of the preceding year.

Border Patrol

The Border Patrol is the police arm of the Immigration and Naturalization Service. As such, it is the nation's only civilian uniformed armed border patrol. Through the Border Patrol, the Immigration and Naturalization Service provides our country its first line of defense against illegal aliens, smugglers and other violators along our land borders and coasts. The following excerpt from the Annual Report of the Commissioner General of Immigration for the fiscal year ended June 30, 1927, described the Border Patrol of today as it did then:

"The border patrol is a young man's organization; it appeals strongly to the lover of the big outdoors.... The business upon which it is engaged calls for manhood, stamina, versatility, and resourcefulness in the highest degree.... The pride of these men in their organization is equaled only by the pride and esteem in which they are held by communities in which they operate....."

"Ex-service men predominate in the border patrol; they must be and are physically fit; they are accustomed to discipline, take readily to it, and like it; they are charged with a serious responsibility and keenly realize it. In the vast majority of cases their work is a religion."

In the twenty-five years since these lines were written, the vital character of the organization has not changed. The Border Patrol each year is faced with appalling numbers of aliens illegally in the United States who must be arrested and taken to points of expulsion from our country. That the number of apprehensions each year has been increasing by the tens and hundreds of thousands is evident from the following chart.

For the fiscal year just ended, Border Patrol officers patrolled more than 11,000,000 miles, questioned 8,700,000 persons, examined 3,000,000 conveyances. These operations resulted in the apprehension of 531,719 deportable aliens. Of these, 1,215 were aliens with criminal records, and 1,122 were smugglers.

These vital statistics of the Border Patrol have further meaning in relation to the past decade when it is realized that there are 350 less men in the authorized force of the Border Patrol today than there were in 1941. This larger force apprehended annually only about 12,000 aliens, about two percent of the number arrested and disposed of today. But great numbers of apprehensions are not necessarily the best kind of law enforcement. Not enough aliens are being arrested yet to serve as a deterrent. In addition, the sheer volume of apprehensions may so submerge the Border Patrol effort that others individually more dangerous to the security of our country may be missed. Officers cannot give their full attention to the apprehension of dangerous aliens when they are promptly enmeshed in the many problems invariably associated with the arrest and transportation of hundreds of illegal aliens every time they go upon the highways or crossing places. This is true even though most of the aliens apprehended are not immediately dangerous.

(1) The Airlift.---A vital part of the Border Patrol operation consists in making effective the apprehension and expulsion of aliens. It is futile for our small Border Patrol force to apprehend aliens unless there is a planned program for discouraging such aliens from immediate illegal return to the United States. To return illegal aliens repeatedly to Mexico, for example, at small border towns hundreds of miles from their homes and lawful means for getting employment is like using a broom against the tide. If these people are to escape actual hunger, they can see no alternative but to return unlawfully to the United States.

The Border Patrol, therefore, has been compelled to seek a method for expelling illegal aliens which itself does not contain the seeds of its own defeat. Surveys revealed that 75 percent of the Mexican aliens apprehended in the Lower Rio Grande Valley of Texas came from deep in the interior of Mexico. The answer therefore, approached with the most careful calculations as to men and money, was the airlift (reported in last year's Annual Report) of aliens into the interior of Mexico at places near their homes. The airlift, then, as a method for immigration law enforcement became the means for syphoning away from the border area the tremendous reservoir of illegally entered aliens who, if merely put across the shallow Rio Grande or the western international boundary, return again and again to engulf more deeply the meager Border Patrol force. A total of 51,504 aliens were so removed during the fiscal year.

Funds for the airlift for the fiscal year 1953 were not appropriated by Congress, so it was necessary that the airlift to Mexico be discontinued during July 1952. This operation had had a very obvious beneficial effect upon the problem of illegal entry from Mexico. Its benefits were so apparent to the Government of Mexico that, upon learning of the discontinuance of the airlift, that Government agreed for the first time to provide military surveillance in connection with movements by train of its nationals from border points to the interior of Mexico following their apprehension after illegal entry into the United States. Hence, the trainlift may carry forward the proven values of the airlift.

(2) Smugglers Apprehended.---As a result of the high prices paid for smuggling aliens, hardened criminals have entered into organized smuggling in a businesslike manner. The dangerous nature of this traffic can be understood best by a brief description of typical alien smuggling activities.

Along the Florida coasts, a typical smuggling case involves European and Chinese aliens, brought from Cuba to the mainland by airplane. Pilots in the United States will fly to the northern coast of Cuba. There are hundreds of well-hidden airfields or strips in northern Cuba from which pilots pick up their human cargo, and land in this country at any one of several abandoned fields. There confederates take over the responsibility for further travel, most often

to points in the East or in the interior of the country, where they can become submerged in large foreign language groups.

The smugglers usually collect their fee from relatives or friends of aliens at the final destination, or the alien, upon safe delivery, sends a code telegram to the contact man in Cuba containing a code word known only to the alien and a relative or friend. The contact man, on the basis of the code word, collects his fee.

A spectacular case involving the use of aircraft to smuggle aliens into the United States came to a dramatic end during the latter part of the fiscal year. It involved one Gregorio Simonovich. Simonovich had been engaged in an air smuggling operation between Havana and Florida for a number of years, smuggling mostly aliens of European or Chinese nationality for fees ranging from \$1,000 to \$2,500 per alien smuggled. An officer of the Service, operating undercover, was successful in infiltrating the smuggling ring headed by Simonovich. Simonovich was apprehended and indicted for conspiracy to smuggle aliens into the United States. He was convicted in February 1952 and sentenced to two years imprisonment. In May 1952 he pleaded guilty to an additional charge of smuggling aliens into the United States and received a further sentence to 13 years imprisonment. This put an end to the operations of an important smuggler of aliens.

While not so expensive, smuggling is much more widespread on the Mexican Border. In a typical case, a contact man assembles the aliens and collects one-half of the fee for travel to Kansas City, Chicago or other interior points, the remainder to be paid upon arrival. The aliens, brought to the United States through the efforts of a second party, are delivered to a man who may appear to operate a travel bureau or a taxi service. The balance of the sum owed the smugglers is often mailed to a friend or relative at the point of destination. The sums paid for transportation to

Chicago from points along the Mexican Border range from \$100 each to \$500 each, depending upon the size of the group and the method of travel. Road blocks, bus checks, and good cooperation in Mexican Border towns have enabled the Border Patrol to make this smuggling a costly venture. Several hundred smugglers engaged in these operations are arrested each year, and the price for each alien has risen to its present high level from \$5.00 and \$10.00 per alien only ten years ago.

Along the Canadian Border 29 smugglers were apprehended last year. In the East the persons smuggled across the Mexican Border are often Europeans or persons of immoral classes. In the West they may be either Europeans or Asiatics. Often the smuggler conducts the alien to a point near the international boundary. There he is instructed to proceed to a near-by point in the United States where a confederate will convey him further into the interior. The amount of money paid here again depends upon the class of alien involved. The risks are quite as great, and the methods by which the aliens protect themselves and their money are not unlike that found in other localities.

Smuggling at seaports usually involves stowaways, a description of which operation is contained elsewhere in this report. A new problem has arisen in the last few years, however, regarding the shrimping fleet in the Gulf of Mexico. During the past year, the shrimping fleet has worked very close to Mexican waters. In fact, the Mexican Navy has seized several vessels claiming they were operating in Mexican waters. A spot check by the Border Patrol at Port Isabel, Texas, for a thirty-day period in November 1951 resulted in the apprehension of over 700 aliens working in the shrimping fleet from that one port alone.

(3) Aliens Apprehended.--This problem, in terms of volume, has grown into fantastic proportions along the Mexican Border. While 510,716 of the illegal aliens apprehended were in the three Mexican Border districts, it is no longer true that Mexican aliens stay in localities close to the border. They have spread to almost every section of the country. Their apprehension in the Seattle and Chicago Districts especially, showed marked increases. From January 30, to March 14, 1952, a fifteen-man Border Patrol detail to Chicago apprehended 1,229 aliens, almost all of whom were Mexicans. During the past year, 25,036 illegal Mexican aliens were apprehended in trades, crafts, and industries. The dangers to the American economy and to the standards of the American working man are clear.

(4) Cooperation with and from other Officers.--During the past fiscal year the Border Patrol apprehended 1,051 violators of other than immigration laws. Seized contraband and vehicles were valued at \$323,718.

(5) Air Patrol.--The Border Patrol has a fleet of twelve planes used for patrolling, signcutting and general scouting duties. During the past year, hundreds of aliens were apprehended by air operations.

Along the Florida coast, Border Patrol airplanes, guided by radio and by information previously received, search for boats coming in with smuggled aliens. They also are used for rapid contact to any one of hundreds of airfields in Florida where information is received regarding smuggling activities. Along the Mexican Border, Border Patrol airplanes are most often used for general scouting. In remote sections of the country, a prompt radio message from plane to a radio-equipped jeep brings a team of patrol officers to arrest aliens discovered by plane. In the Lower Rio Grande Valley of Texas, several task groups of five patrol officers each, with a bus, a radio-equipped car or a jeep, and a truck, will meet to form a task force. This force guided by airplanes may apprehend as many as 1,000 or 2,000 illegal aliens per day. This is a spectacular operation which, in size and in accomplishment, has never before existed in the field of civilian law enforcement in this country.

(6) Radio.--Radio equipment is vital to the success of Border Patrol operations. Throughout the Borders, the headquarters of Border Patrol sectors are linked together and then each sector headquarters is linked to its men through radio-equipped automobiles, jeeps, and airplanes. During the past year, the entire Mexican Border has been linked with FM, and now, throughout the Border, officers can communicate with their headquarters and with their brother officers with telephone-like efficiency.

(7) Border Patrol Training School.--The Border Patrol Training School staffed with experienced Border Patrol Officers has been located at New Mexico A. & M. College, near Las Cruces, New Mexico--less than forty miles from El Paso, Texas. Here, through classroom instruction, drill and demonstrations, Border Patrol recruits are taught immigration law, Spanish, their duties and authority as patrol inspectors, marksmanship, self-defense methods, first aid, and the methods of Border Patrol operations.

The assignment of trained officers to other branches of the Service, in addition to normal depletion of force, emphasized the importance of effective, early, and rapid officer training. The Border Patrol offers an interesting and hazardous life.

While there were the usual number of encounters with lawless men of the Border, only one officer was seriously injured in line of duty. The Patrol Inspector in Charge at Eagle Pass, Texas, was shot and gravely wounded by a smuggler, but has now recovered.

Detention

Stated in the simplest of terms, aliens are detained by this Service (1) because they have arrived seeking admission to the United States, and their entry is denied or delayed because they cannot or do not appear to meet the requirements of immigration laws for admission; and (2) because they have been apprehended in the United States and are detained pending deportation or other

formal action. For a number of reasons, the number of aliens detained was greater in 1952 than in 1951. The Internal Security Act empowered the Attorney General to detain certain aliens pending a determination of deportability. The operation of the airlift meant that large numbers of aliens were collected in one place and detained for short periods. The care with which suspected subversive aliens had to be examined when they sought admission, and the extensive research into the backgrounds of Chinese claiming United States citizenship, all contributed to an increase in detentions.

The fiscal year 1952 was marked by progress in every phase of the detention operation, notwithstanding the fact that there was sufficient personnel during a year for an increase of 62 percent in the total number of aliens detained, and of 46 percent of the total mandays of detention. The detention situation was under constant review particularly at Ellis Island, San Francisco and along the Mexican Border. When necessary, instructions were issued by the Central Office to release under parole so-called "hardship" cases.

The result of such review is indicated by the fact that the average number of days detention per person was 8.5, slightly less than that of fiscal year ending 1951. Extraordinary efforts were required, particularly by supervisory personnel throughout the detention operation, to minimize security risks and keep the many complicated processing procedures moving so that aliens would not remain in custody any longer than necessary pending determination of deportability and would be deported as soon as practicable after an order of deportation is entered.

(1) Mandays of Detention and Aliens Detained.--The figures which follow show that an increase of 46 percent in mandays of detention has taken place since June 30, 1951:

	<u>Mandays of detention</u> <u>Years ended June 30,</u>	
	<u>1952</u>	<u>1951</u>
Total.....	<u>1,187,617</u>	<u>813,427</u>
Service operated facilities	739,875	446,911
Non-Service operated facilities	447,742	366,516

The average number of days detention was slightly less than the previous year, as shown in the following figures:

Aliens detained and average days detention
Years ended June 30, 1950-1952

<u>Years ended:</u>	<u>Total</u>	<u>In Service operated facilities</u>	<u>In non- Service operated facilities</u>
<u>1952:</u>			
No. of aliens detained	201,618	86,570	115,048
Average days detention	5.9	8.5	3.8
<u>1951:</u>			
No. of aliens detained	124,187	48,627	75,560
Average days detention	6.6	9.2	4.8
<u>1950:</u>			
No. of aliens detained	97,710	38,515	59,195
Average days detention	6.9	10.6	4.4

The number of aliens who remain in detention beyond the average length of time is very small. Most prolonged detentions result from (1) appeals and legal efforts on the part of the detainees to remain in the United States following exclusion or the issuance of an order of deportation, and (2) difficulties experienced by our Service in the procurement of passports and travel documents to their native countries. During the past year, the number of Chinese nationals in detention has been reduced as a result of an Administrative Order

Issued April 8, 1952, (OI 145.1) which authorized the District Director to parole Chinese aliens whenever in his discretion such parole would not be prejudicial to the best interests of the United States.

(2) Culinary.--More than two million meals were served at Service operated facilities during the fiscal year ended June 30, 1952. This represents an increase of some 850,000 meals over the previous year. All foodstuffs are procured from depots maintained by the Bureau of Federal Supply or under competitive bids from wholesalers, whichever is more advantageous to the government. Although many economies were achieved during the last year, per capita food costs per day increased seven and one-half cents over the previous year. The average cost per meal is now 22 cents, as compared with .195 at the close of business June 30, 1951.

The planning of low cost, well balanced, nutritious meals continues to receive careful attention since it is recognized that food is not only related to health, but it is an important factor in promoting a generally cooperative attitude among the detainees.

(3) Visiting Privileges.--Two other phases of detention work which contribute substantially to the contentment and morale of detainees are visiting privileges and assistance in settling personal affairs prior to departure. Last year approximately 75,000 persons visited aliens who were detained in Service operated facilities. To provide for efficient control of this activity, existing procedures require that a request for a visit be initiated by the detainee. The request is screened by the Chief Security Officer and, if approved, a pass is issued for a specific time and mailed by the Service to the person named in the request. Upon arrival at the facility, the visitor identifies himself and presents the pass. When he leaves, the pass is turned in and placed on file for reference.

(4) Escorts away from Detention Facilities.--All aliens who are deported are conveyed under guard to ports of deportation, however, prior to departure many of them must be assisted in matters which require escort away from the facility. During the past year there were more than 25,000 escorts, the majority of which concerned the recovery of personal belongings, the settlement of financial affairs, collection of wages, the procurement of travel documents and passports from consulates. In addition to the foregoing escorts, which are specifically associated with deportation and departure, there were others which relate to the presentation of aliens at courts for prosecution; the transfer of aliens from one Service facility to another for hospitalization and medical attention, etc. Aliens under escort frequently belong to criminal, insane, immoral or subversive groups, are often difficult to handle and represent a maximum security risk.

(5) Improved Detention Facilities.--With the larger numbers of aliens detained, the need for new or improved detention facilities

became ever more pressing. A number of new projects were undertaken and some remodelling was completed during the year.

Work was begun on a new detention facility at Chula Vista, California, located on the southeast perimeter of San Diego, seven miles north of the Mexican Border, which will house from 200 to 400 persons. Upon completion of this station, Camp Gillespie at El Cajon, a portion of which this Service now rents from the county of San Diego, will be closed. All equipment and personnel will be transferred to the new station. Eventually the Chula Vista station will be enlarged to include the Border Patrol Sector in that area.

To meet the demand for more adequate housing accommodations the Service detention quarters at El Centro, California, which has been operated upon a standby basis since 1945, will become a permanent station in the near future. Extensive repairs are under way and new equipment is being installed. This facility with a maximum capacity of 500 will serve our own expanding needs. It also will allow the Service to cooperate to a greater extent with the U. S. Marshal in connection with aliens who must be held as Government witnesses for prosecution.

In June plans were completed and contracts let for the construction of a detention camp at Hidalgo, Texas with a maximum capacity of 1,000 for the purpose of processing Mexican alien "wetbacks" apprehended in the Brownsville-McAllen-Hidalgo area and expediting their departure to Mexico. This camp will be ready for operation within 30 days.

For many years jails along the entire Mexican Border have been over-crowded with aliens who were taken into custody and placed in detention by this Service until their deportation or removal could be effected. The new facilities at Hidalgo, Chula Vista, and the enlarged station at El Centro will help to fill a long felt need with regard to the apprehension, detention and deportation or removal of Mexican aliens in the Imperial Valley, along the West Coast and in East Texas. It is estimated that these camps will more than pay for their construction during the first year of operation by the greatly reduced use of contractual jails.

The program of renovation and repair of Ellis Island, which has been under way for the past three years, is beginning to show results. Several major physical changes were effected during June. These included the transfer of security unit supervisory offices to the first floor of the facility and the installation of a public address system, both of which will assist greatly in coordinating the various security functions in one area and provide a means of contact at all times between security personnel and every post inside and outside the station. Much time will be saved and more efficiency will result from this integrated system of surveillance.

The 30-bed infirmary, which is under the supervision of the U. S.

Public Health Service and which was opened last year, is almost completed. The space is divided into a ward for women and children, a male ward and an isolation ward. The general health of the detainees is good, due, in no small part, to the excellent service rendered in the clinic in treating minor complaints. Detainees suffering from serious illnesses are sent to the U. S. Marine Hospitals at Staten Island and Hudson and Jay Streets, and to the Bellevue, New York, and Willard Parker Hospitals in New York City.

Fifty additional beds and other dormitory equipment have been installed in the wing adjacent to the infirmary for medical hold cases, thus giving full meaning to a Service policy which requires the segregation of newly arrived detainees until a clean bill of health can be given by the Public Health Service.

Preliminary plans and drawings have been submitted by the District Director for furnishing and equipping the passengers lounge, family quarters and warrant room. The Prisons Industries have been asked to submit estimates of cost and to cooperate in submitting plans for the design and manufacture of a type of furniture which will stand heavy wear and yet present an attractive appearance.

This detention station, with its great, wide halls and corridors, high ceilings, unusable spaces and outmoded utilities, will always present the dual problem of how to utilize it with economy and yet make it serve our purposes efficiently.

During the past year when the housing situation became acute due to overcrowding at the San Francisco Detention Facility, arrangements were made with Alameda County to occupy a section of the Santa Rita Rehabilitation Farm, which is located at Pleasanton, about 40 miles from San Francisco, for overflow detainee population. It is planned to continue the use of this facility whenever the population exceeds 200.

Alien Parole

Under the provisions of Sec. 20(a) of the Immigration Act of February 5, 1917, as amended September 22, 1950 by the Internal Security Act, the Attorney General may detain, release under bond, or release under conditional parole apprehended aliens pending determination of their deportability and for a further period of six months following order of deportation. Under Sec. 20(b) such aliens may be subject to supervision if deportation has not been effected during that period. At the end of the fiscal year, there were 24,966 aliens at large under these provisions. The vast majority were on conditional parole awaiting a hearing or a determination of deportability. Others were on conditional parole pending the results of appeals or because of the introduction of private bills. There was, however, a steady increase in the number who were placed under supervision after orders of deportation had been outstanding for six months. This was largely because the Service was unable to procure the needed travel documents or to complete travel arrangements.

During the fiscal year, 2,915 were placed under bond and 1,518 bonds were terminated, a net increase of 1,397; 22,085 were paroled, and 11,274 paroles were terminated, a net increase of 10,811; 1,938 were placed under supervision and 866 terminated, a net increase of 1,072; a grand total of 26,938 additional and 13,658 terminated, leaving a net grand increase of 13,280 under the control provisions of the Act.

The number of aliens under bond or conditional parole at the end of the fiscal year was approximately double the number in such status on June 30, 1951; while the number under supervision was one and one-half times as great.

Aliens at Large under Control Provisions of

June 30, 1951 June 30, 1952

As of end of	Grand total	Section 20(b) Super- vision	Bond -- Sec. 20(a)			Parole -- Sec. 20(a)		
			Total	Pend- ing order	After order	Total	Pend- ing order	After order
June 1952	24,966	1,751	2,817	2,518	299	20,398	19,486	912
May "	24,403	1,798	2,731	2,435	296	19,874	19,000	874
Apr. "	23,573	1,715	2,657	2,340	317	19,201	18,416	785
Mar. "	22,557	1,585	2,563	2,234	329	18,409	17,665	744
Feb. "	21,575	1,438	2,523	2,207	316	17,614	16,775	839
Jan. "	20,693	1,340	2,493	2,149	344	16,860	16,061	799
Dec. 951	18,666	1,269	2,181	2,066	115	15,266	14,658	558
Nov. "	18,185	1,208	1,964	1,878	86	15,013	14,425	588
Oct. "	17,301	1,080	1,931	1,850	81	14,290	13,722	568
Sep. "	15,628	934	1,937	1,852	85	12,157	12,190	567
Aug. "	14,156	848	1,788	1,714	74	11,520	10,961	559
July 1951	12,924	715	1,550	1,490	60	10,659	10,146	513
June 1951	11,686	679	1,420	1,365	55	9,587	9,056	531

It is of interest that the relatively small number entered "After Order" (after final order of deportation has been made) reflects the relatively few cases in which it was found desirable to change the conditions of bond or parole. Four cases were presented to the United States Attorneys for prosecution for violation of conditions of supervision.

There still remain some 2,500 cases to be brought under conditional parole or formal supervision pursuant to the Internal Security Act. This is in contrast to the backlog of 15,600 cases at the close of last fiscal year. Of these 2,500, many had been paroled or released under bond prior to the passage of the Internal Security Act, but the conditions of their enlargement must nevertheless be formalized in accordance with the present law.

Exclusions

Aliens who arrive at ports of entry seeking admission to the United States may be excluded if they fail to qualify under the immigration laws of the United States. In most instances aliens held for exclusion are given a hearing before a three-member Board of Special Inquiry. From an order of exclusion by the Board, an appeal lies to the Board of Immigration Appeals except in certain instances when the Public Health Officer certifies an alien to be inadmissible.

Other cases in which there is no appeal are those cases in which the excluding decision is based on confidential information, the disclosure of which would be detrimental to the public interest.

During the fiscal year 1952, 5,050 aliens were excluded from the United States, 2,106 of whom sought admission at the Canadian and Mexican land borders for less than 30 days. Seventy-six percent were excluded on documentary grounds. During the past year, 139 alien border crossers and nine other aliens were excluded on subversive grounds.

Aliens excluded from the United States, by cause
Year ended June 30, 1952

INVESTIGATION

The Service is keenly aware that its law enforcement responsibilities are constantly expanding in scope under the prevailing conditions of international political and economic instability. The investigative activities of the Service are of prime importance. They play an especially vital role in three areas of the Service's enforcement responsibilities.

The most important area is the expulsion of aliens and the denaturalization of persons illegally naturalized who are or have been connected with the world-wide Communist movement. In this connection the Congress, in the Internal Security Act of 1950, made findings based upon evidence adduced by various Congressional committees that the world Communist movement operates through affiliated constituent elements in the various countries of the world, and depends upon the travel of Communist members, representatives and agents from country to country for the furtherance of its purposes. Furthermore, the Congress found that Communist activity in the United States is inspired and controlled largely by foreign agents. Accordingly, severance of the foreign control of this Communist activity in the United States is, in large measure, an immigration problem.

The second most vital area of investigative responsibility is the ferreting out at the earliest possible time after entry and the expulsion from the United States of aliens who are criminals, immoral persons, narcotic law violators, or mentally or physically unfit.

The third most essential enforcement task of the Service in which investigations are important involves the stamping out of the smuggling of aliens into the United States, and the early detection and expulsion of the mounting numbers of illegal entrants who seek to reside unlawfully in the United States. These activities threaten the controls that our country has found necessary to impose because of the large numbers of persons who desire to come here and share our bounty. The

law abiding immigrant patiently waits his turn overseas for the visa which will permit his lawful entry and residence in the United States. In justice to him, the law breaker who enters by illegal means and who resides here in violation of the law must be promptly detected and expelled.

These and the other enforcement responsibilities incumbent upon the Service in administering the immigration and nationality laws are prodigious. Competent administration of these laws depends on efficient and expeditious investigations for several reasons in particular. Our American traditions require that in each case the Service develop the facts through careful investigation before acting to deny, revoke, or limit any privileges or rights it confers or recommends under the immigration and nationality laws. At the same time, it is essential that the Service's investigations be promptly conducted so that delays in enforcement will not frustrate the law.

The recognition of the vital role of investigative responsibility led to the establishment of a separate Division under an Assistant Commissioner for Investigations, reporting directly to the Commissioner. This marks a new page in the development of the Service's investigative activities. In the fiscal year 1948 investigations was established as a Section in the Enforcement Division in order to organize, coordinate and direct the investigative activities of the Service. During the fiscal year 1949 the Investigations Section was fully organized and its activities commenced to assist in all phases of the enforcement work of the Service. In fiscal years 1950 and 1951 the effective work done by the investigations Section led to expansion of the Central Office investigative force, and more vigorous investigative activities in the field. In each of these years an increasing number of investigative cases was completed by the Service. In fiscal year 1951 the large number of 256,990 investigations was completed. Yet, during the current fiscal year nearly double that number, 498,237 investigations, were completed. However, at the close of this fiscal year a great deal of investigative work remains to be done. The year closed with a backlog of investigations totaling 143,626 cases. It is thus readily apparent that to carry out the investigative program of the Service it is necessary that the Service redouble its investigative efforts. The Division with its personnel augmented and the scope of its activities extended, proposes to work toward this end during the next year.

The current fiscal year marked some notable achievements. During this year investigations conducted a training program designed to more fully qualify the Service's investigative personnel to discharge the mounting law enforcement responsibilities of the Service. Investigators from all districts were given an intensive and comprehensive course dealing with investigative techniques and the specialized procedures applicable to immigration and nationality investigations. The course was designed to benefit newly appointed investigators as well as investigators long experienced in the Service. Other accomplishments in the various areas of our investigative work are as set

out below under the appropriate headings.

(1) Anti-Subversive Operations.--(a) Exclusion Cases.-- Investigators have been especially active in procuring intelligence information leading to the temporary exclusion of aliens seeking admission to the United States whose entry might be prejudicial to the public interest, safety or security. These exclusions are effectuated under the authority conferred by the Internal Security Act of 1950, temporarily to exclude any alien whose entry may appear to be a threat to the internal security of the United States. Under the law, if it is determined on the basis of information of a confidential nature, the disclosure of which would be prejudicial to the public interest, safety or security, that the individual's entry would be or would likely be a security threat, further inquiry into the case must be denied and the individual must be deported. At all times the Service seeks to procure all the relevant facts, so that this power may be administered in conformity with our American standards of fairness to the fullest possible extent consistent with our national security interests.

(b) Deportation Cases.--The Internal Security Act of 1950, by amending the Act of October 16, 1918, the basic immigration statute dealing with the exclusion and deportation of subversives, has facilitated the conduct of subversive investigations by the Service with a view to deportation. The Internal Security Act of 1950 took it as established that the Communist Party of the United States or in any other country has as its purpose the establishment in the United States and throughout the world of Communist totalitarian dictatorships. Accordingly, it eliminated the need to prove this fact in each and every case of an alien charged with being deportable on subversive grounds. This relieved the Service of the burdensome task of repeatedly showing this fact in subversive deportation cases.

During the current fiscal year 6,101 investigations were conducted and completed with a view to establishing deportability on subversive grounds. This represents an almost three-fold increase over the number of such investigations completed during fiscal year 1951. Since such investigations are difficult and represent the expenditure of many productive man-hours of investigative work, this figure represents a noteworthy accomplishment.

In sum, the Service carried on a vigorous investigative campaign during the past year with a view to the denaturalization, expulsion and exclusion from the United States of persons connected with the world Communist movement. In close cooperation with the various security agencies of the Government, the Service has broadened its facilities for analysis, coordination and Service-wide dissemination of intelligence information bearing upon this important phase of the work of the Service.

Exemplifying the outstanding results of the investigative efforts of the Service to rid the country of subversive aliens is

the case of Andrew Dmytryshyn. He was accorded a deportation hearing on a charge of membership in the International Workers Order. It was contended by the Service that the International Workers Order was affiliated with the Communist Party of the United States and that Dmytryshyn, through his membership and activities in the International Workers Order, had affiliated himself with the Communist Party of the United States. On December 26, 1951, the Board of Immigration Appeals upheld the Service and determined that Dmytryshyn was deportable from the United States on the subversive charge. This decision is the culmination of long and intensive efforts of the Service to procure competent evidence establishing the subversive connection between the International Workers Order and the Communist movement.

(c) Denial of Naturalization Cases.--The Internal Security Act of 1950 amended the provision in the Nationality Act of 1940 which bars from naturalization persons engaged in subversive activities. The Act enlarged the classes of persons and the types of organizations deemed to fall within the statutory prohibition designed to bar the naturalization of subversives. An increased number of investigations was conducted of applicants for naturalization during the year to determine whether they were within this proscription of the naturalization law.

(d) Revocation of Naturalization Cases.--The Internal Security Act of 1950 amended the Nationality Act to provide that subversive activity within a period of five years after naturalization shall be ground for revocation of naturalization. This applies to any person naturalized after January 1, 1951, and opens a new field for subversive investigations. During this fiscal year the Service completed a total of 1,824 investigations which sought to determine possible revocation of naturalization on subversive grounds.

The Service considers that every investigative effort should be expended to the end that subversives will not be naturalized as citizens of the United States and that if perchance any subversive is naturalized in violation of the law, the naturalization will be revoked at the earliest possible time. In this class of investigations, each case successfully completed represents many man-hours of difficult work.

(2) Anti-smuggling and Stowaway Operations.--During the fiscal year just ended the Service has continued to combat the illegal entry of aliens into the United States, and especially to prevent the smuggling of aliens across the land borders of the United States or as

stowaways aboard vessels or aircraft. The number of apprehensions during this year of natives of countries other than those bordering on the United States who were smuggled into the United States has nearly doubled over the preceding year. Allied with the alien smuggling problem is the problem posed by the use of the seaman avenue to gain illegal entry into the United States. This continues to be a tremendous problem in view of the large numbers of foreign seamen who annually come to our shores. The investigative forces have endeavored, through centralized coordination and direction, to prevent the use of all these routes of illegal entry.

With respect to the detection of stowaways, the Service has been following the practice of searching, wherever practicable, vessels on which it appears that stowaways may be transported, especially where information is received that members of the crew have been aiding the stowaways. The value of this operation is exemplified by the case of the SS "Paolina". In February 1952 a search of this vessel on its arrival at Philadelphia resulted in the apprehension of two Italian stowaways. It developed that one of these stowaways had been refused entry in the United States. The other had been deported previously as a narcotics violator.

(3) Fraud Operations.--During this fiscal year the Service succeeded in uncovering some 40 cases involving fraudulent procurement of United States passports by Filipinos in the Honolulu area. A number of these law violators were prosecuted.

A case closed in this year involved the operation of a large fraud ring in the Rio Grande Valley. Investigation by the Service established that one Salome Quintanilla, a resident of Monterrey, Mexico, had assisted possibly hundreds of aliens of Mexican nationality to secure false documents which enabled them to apply for immigration visas to enter the United States. Quintanilla is presently under arrest in Mexico, charged with obtaining fraudulent documents from Mexican officials.

(4) General Operations.--The Service increased its general investigative operations all along the line in fiscal year 1952. Almost one and one-half as many warrants of arrest were issued during this fiscal year as were issued during the preceding year. This increase resulted in part from the conduct by the Service of "free lance" investigations seeking to find aliens illegally in the United States in the various places where aliens are known to congregate. It is noteworthy that these "free lance" operations resulted in the institution of deportation proceedings against a large number of aliens who otherwise would not have been apprehended by the Service.

It is with pride that the Service points to these achievements in the field of investigations. Yet, ahead lie even greater tasks. The new Immigration and Nationality Act extensively increases the investigative, as well as the other responsibilities of the Service. When its provisions become effective on December 24, 1952, the

Service's investigative forces will have to effect an unprecedented expansion to meet the new operational responsibilities placed upon them by this legislation. If the Service is given the additional investigative personnel needed to meet these new responsibilities, the Service's investigative forces will be able to accomplish unparalleled achievements in the effective enforcement of the immigration and nationality laws in the next fiscal year.

While the Service has uppermost in its program, enforcement for internal security, it has a role in another and different type of program, that played in the naturalization process. Possibly aliens who become naturalized, by the very requirements for naturalization, come to have a more specific knowledge of our Constitution and Government than do many native-born citizens. Certainly, such knowledge is one bulwark against communist ideologies. The correlation between immigration and naturalization is not too perfect; nevertheless, naturalization, with various time lags due to differences in length of residence requirements, follows the pattern of immigration. Thus, naturalizations in the past three or four years, have been low because immigration was very low during the war. This year, however, seven years after the end of the war, the naturalization trend line takes a sharp upward turn.

Immigration, particularly of war brides and displaced persons began immediately after the termination of World War II. These immigrants, excepting those recently admitted in the final stages of the Displaced Persons Program, are now rapidly becoming eligible for naturalization by reason of the lapse of residence period requirements. Other factors have, no doubt, accelerated interest in naturalizations: (1) the near-war in Korea; (2) the annual Alien Address Report Program, which reminds aliens of their alien status, and (3) the requirement by the various branches of the Department of Defense that companies engaged in defense production hire aliens only if they have declarations of intention, and the further requirement that in sensitive production, companies hire only citizens of the United States. All of these things make United States citizenship attractive.

The Internal Security Act changed some of the requirements with regard to naturalization. Included among the changes were the provisions that the petitioner must establish that he was not

a member of a totalitarian organization during the ten years prior to the date he filed his petition; that no person can be naturalized against whom there is outstanding an order of deportation; and that each petitioner must be able to read and write, as well as speak the English language. Persons with 20 years residence in the United States and who are over 50 years of age are exempted from the literacy provision in the law.

Declarations filed.--Generally, the first step toward naturalization is to file an application for a declaration of intention to become a citizen and prove admission for lawful residence. In the past fiscal year, applications for declarations numbered 133,341, six percent more than the 125,262 filed last year. Certificates of arrival were issued by field offices to 131,255 persons. Declarations filed equaled 111,461, almost 20 thousand over last year's figure of 91,497.

Petitions filed.--There were 94,086 petitions for naturalization filed last year. This figure represents a 53 percent rise since 1951, and is the highest in any year since 1946. At the end of the fiscal year, there were still 29,473 petitions pending which required action.

Petitions granted.--The number of naturalizations, which declined rapidly since the peak year in 1944, for the first time took an upswing in the past year to 88,655, or 33,939 higher than 54,716 naturalized in the fiscal year 1951. The reasons which influenced a change in the trend are given in the paragraphs above.

An analysis of the 1952 figures shows that the chief increases were in the number of persons naturalized who were married to citizens, which rose from 36,433 in 1951, to 58,027 in 1952. This group, which represented two-thirds of all naturalizations, no doubt, included many war brides who have come to this country since the War. The principal nationalities represented were British, German, Italian and Canadian. Naturalizations under general provisions of the laws nearly doubled to 26,920. Military naturalizations of 1,585 exceeded last year's figures by 610.

The table which follows shows the principal countries of former allegiance of persons naturalized:

<u>Former nationality</u>	<u>Years ended June 30,</u>				
	<u>1952</u>	<u>1951</u>	<u>1950</u>	<u>1949</u>	<u>1948</u>
Total.....	88,655	54,716	66,346	66,594	70,150
British.....	14,993	10,867	12,697	13,284	12,361
German.....	13,538	5,439	6,065	5,777	7,486
Canadian.....	10,004	5,872	5,882	5,347	3,860
Italian.....	9,720	5,975	8,743	8,301	9,452
Polish.....	5,858	3,100	3,793	4,371	5,136
U.S.S.R.....	2,851	1,830	2,122	2,752	3,143
Mexican.....	2,496	1,969	2,323	2,227	1,895
Filipino.....	1,813	1,595	3,257	3,478	5,768
Other.....	27,382	18,069	21,464	21,057	21,049

Petitions denied.--The number of petitions denied has been slightly over 2,000 for the past four years. Three-fourths of the 2,163 petitions denied in the fiscal year 1952 were denied because the petitioner withdrew or failed to prosecute the petition.

In fiscal year 1951, 219 petitions were denied because of failure to establish knowledge and understanding of the fundamentals of the history, and the principles and form of Government of the United States. In 1952 only 105 were denied for this cause. Six petitions were denied because the petitioner was unable to write, read, and speak English. There appears to be no significant change in the figures of denials on this ground since 1949 and 1950, when the requirement was only the ability to speak English.

Ninety petitions were denied last year because of lack of good moral character. Denials on this ground, which were relatively high before and during the war, were 16 percent of the total denials in 1943, but have since declined to four percent in 1952. Seven petitions were denied because there was an outstanding order of deportation.

Naturalizations revoked.--All except four of the 279 certificates of naturalization revoked last year were initiated by the Foreign Service of the State Department because naturalized citizens became residents of foreign states within five years of naturalization. The number revoked in the past two years, by cause, is shown in the table which follows:

Certificates of naturalization revoked, by
grounds for revocation
Years ended June 30, 1951 and 1952

Grounds	1952	1951
Total.....	<u>279</u>	<u>403</u>
Established permanent residence abroad within five years after naturalization.....	275	394
Failed to meet residence requirements (false allegations).....	-	5
Bad moral character (fraud involved).....	1	1
Misrepresentations and concealments relating to marital and family status.....	2	3
Bad moral character (no fraud involved).....	-	2
Dishonorable discharge following naturalization based on military service during World War II...	1	2
Unwilling to bear arms (oath taken with mental reservations).....	-	1
Naturalization fraudulently or illegally procured.	-	2
Other grounds.....	-	3

Loss of nationality.--In addition to loss of nationality by revocation of naturalization, persons may expatriate themselves by affirmative action, such as by naturalization in a foreign state. Following the end of World War II, the number of expatriations rose to a high of 8,575 in 1949. Since then the number has declined steadily, and in the fiscal year 1952, 3,265 persons expatriated themselves. Voting in a foreign political election or plebiscite has been the chief ground for expatriation in the last few years. Most of the certificates of loss of nationality are received from American consuls of the Department of State. The various ways of losing nationality, which are stipulated in Chapter IV of the Nationality Act of 1950 and in previous acts, and the numbers of persons are shown in the following table:

Persons expatriated, by grounds for expatriation
Years ended June 30, 1951 and 1952

Grounds for expatriation	<u>Number of persons</u>	
	1952	1951
Total.....	<u>3,265</u>	<u>4,443</u>
Voting in a foreign political election or plebiscite	1,186	1,401
Residence of a naturalized national in a foreign state (Sec. 404, Nationality Act of 1940).....	676	1,084
Naturalization in a foreign state.....	622	836
Entering or serving in the armed forces of a foreign state.....	370	565
Renunciation of nationality abroad.....	136	228
Taking an oath of allegiance in a foreign state.....	123	147
Accepting or performing duties under a foreign state	56	73
Departing from or remaining away from the U.S. to avoid training and service in land or naval forces	59	69
Desertion from the armed forces.....	-	2
Other grounds.....	37	38

Citizenship acquired by resumption or repatriation.--Statutory authority exists for the re-acquisition of citizenship by persons who lost United States citizenship under certain conditions.

The number of former citizens who received certificates of citizenship under such conditions is shown in the table below.

	<u>Years ended June 30,</u>		
	<u>1952</u>	<u>1951</u>	<u>1950</u>
Total number.....	<u>1,406</u>	<u>1,242</u>	<u>1,219</u>
Persons who lost citizenship by serving in the armed forces of allies of the United States, and who were repatriated under Sec. 323, Nationality Act of 1940.....	147	256	275
Native-born women who lost citizenship through marriage to aliens and who were repatriated under the Act of June 25, 1936, as amended..	778	839	773
Native-born women who lost citizenship through marriage to aliens and whose marriages terminated, and who were repatriated under Sec. 317(b) of the Nationality Act of 1940.....	160	145	170
Persons repatriated under private laws.....	5	2	1
Persons who lost citizenship through voting in a political election or plebiscite in Italy and repatriated under P.L. 114 of Aug. 16, 1951	316	-	-

Until passage of the Act of August 7, 1946, (60 Stat. 866), there were no special provisions in the nationality laws concerning the regaining of citizenship by persons who lost their citizenship by voting in a foreign political election or plebiscite. The Act provided for the expeditious naturalization of persons who lost citizenship by voting in a foreign political election after January 12, 1951, in a non-enemy country. This law expired on August 6, 1947, and 1,320 persons were repatriated under its provisions. On August 16, 1951, Public Law 114 was enacted, which repealed the Act of August 7, 1946, and provided for the expeditious naturalization of former citizens of the United States who lost citizenship through voting in a political election or plebiscite held in Italy. As of June 30, 1952, 316 persons had been repatriated under the provisions of this law.

Derivative citizenship.--The requirements of the Internal Security Act stimulated the interest in proof of derivative citizenship. During the fiscal year 1952, there were 23,976 applications by persons who claimed that they derived citizenship at some prior time through the naturalization of parents. There were 18,632 derivative certificates completed.

In addition, certificates of citizenship were issued to 5,912 persons by reason of their birth abroad to citizen parents.

Citizenship Education

The citizenship education program of the Service has been in continuous operation since 1918. The program was authorized by the Act of May 9 of that year, and further strengthened by the Nationality Act of 1940, the Internal Security Act of 1950, and the Immigration and Nationality Act of 1952.

The Internal Security Act of 1950, with certain exceptions strengthened the requirements for naturalization by making the ability to read, write, and speak English a prerequisite to naturalization. In addition, the candidate for naturalization must not only know and understand the principles and form of Government of the United States, but must also have knowledge of its history. The citizenship education program consists of: cooperating with public schools through editing and distributing citizenship textbooks for use in public school classes or home study courses; informing the public schools of potential candidates for citizenship; and promoting meaningful naturalization ceremonies.

The statistics on the citizenship program follow:

Citizenship textbooks for naturalization applicants distributed to the public schools			
Years ended June 30, 1946 - 1952			
1946.....	179,694	1950.....	190,038
1947.....	190,354	1951 <u>1</u> /.....	166,833
1948.....	149,600	1952 <u>2</u> /.....	158,385
1949.....	145,528		

Names of newly-arrived immigrants

Transmitted to the public schools by the field offices....	198,826
Noncitizens referred by the field offices to public-school classes.....	142,076

Home Study

Names of noncitizens supplied by the field offices to State universities and State correspondence centers.....	32,546
Noncitizens informed by the field offices of facilities for correspondence courses.....	39,715

Public-school classes and enrollments

Public-school (and Home Study Course) classes organized during fiscal year 1952 <u>3</u> /.....	3,001
Candidates for naturalization enrolled in all classes during the last fiscal year <u>3</u> /.....	89,941

- 1/ In addition 75,689 books were ordered, but were not distributed because they were out of stock.
- 2/ In addition 51,249 books were ordered, but were not distributed due to supply shortages.
- 3/ This information is taken from reports made by public schools at the time textbooks are requisitioned, and may be regarded as reasonably complete.

Names of newly-arrived immigrants.-- Since March 1, 1950, all work pertaining to the preparation and dissemination of visa-name slips has been accomplished by the Field Offices of the Service. From July 1, 1951, through June 30, 1952, a total of 186,691 such slips were sent to public-school officials. They were used to notify alien naturalization applicants of citizenship education classes. The value of this program is reflected in the great increase in public-school class facilities -- from 1,860 in fiscal year 1951, to 3,001 in fiscal year 1952.

Home-study program.-- State colleges and universities, particularly through their extension services, conduct the Home Study Courses. Text-books used in the courses are distributed by the Service under provision of the law. This program brings to outlying districts of the United States the benefits of organized instruction in this important phase of adult education.

Public-school certificates of proficiency.-- The Service and courts continued to accept public-school certificates showing the satisfactory completion by candidates for naturalization of courses of study upon the basic principles of the Constitution and Government and the History of the United States. The following naturalization courts have accepted such certificates as evidence of the petitioner's educational preparation to meet naturalization requirements: All Federal Courts in the States of Connecticut, Massachusetts, and Rhode Island, and the District Courts in Chicago, Illinois, Wayne, Indiana, Baltimore, Maryland, Detroit and Grand Rapids, Michigan, Duluth, Minneapolis, and St. Paul, Minnesota, Camden and Trenton, New Jersey, Albuquerque, New Mexico, Toledo, Ohio, Philadelphia, Pennsylvania, and Milwaukee, Wisconsin; the Supreme Court of New York State at Niagara Falls, N. Y., District and Superior Courts at Sacramento, California, all State Courts in the States of Connecticut, Massachusetts, and Rhode Island, one State Court in Indiana, 37 State Courts in Michigan, and four State Courts in Ohio; and County Courts in the New Jersey Counties of Atlantic, Burlington, Cape May, Cumberland, Gloucester, Ocean and Salem.

Special programs.-- The fiscal year 1952 marks the tenth year in which the Immigration and Naturalization Service has participated in several special programs emphasizing the importance of citizenship. In 1942 a nation-wide movement was initiated to make the naturalization ceremony a more meaningful and inspirational occasion. To help accomplish this purpose the Service issued Gateway to Citizenship, a manual prepared in cooperation with the committees on American citizenship of the American Bar Association and the Federal Bar Association -- this cooperation has continued to the present.

This publication was designed primarily for use by the courts, the staff of the Immigration and Naturalization Service, civic and educational authorities, veterans' and other interested organizations, in their efforts to stress the worth and meaning of citizenship -- particularly at the time of admission to citizenship through the naturalization process.

The response to letters calling attention to Gateway to Citizenship, sent to all United States District Court Judges and others, by the Honorable Harlan F. Stone, then Chief Justice of the United States, and the Commissioner of Immigration and Naturalization, showed great interest in the subject of citizenship. Many letters received also suggested that emphasis on citizenship should not be limited to the naturalization ceremony, but extended to a long-range, larger citizenship program that would precede and follow citizenship induction.

In 1946, therefore, the Attorney General appointed an Advisory Committee of distinguished citizens who had made outstanding contributions in various aspects of the citizenship field. The Commissioner and the General Counsel of the Immigration and Naturalization Service, and the present Assistant Commissioner of the Citizenship Services and Instructions Division of the Service, were included on this committee.

The committee at its first meeting recommended, among other things, "... a continuous effort to stress the ideals of this country and the significance of American citizenship from the time of entry of a potential citizen to the moment when citizenship is granted him by the court and even beyond that." The committee further recommended that the Department of Justice jointly sponsor the Annual National Conference on Citizenship composed of representatives of public and private organizations and agencies interested in citizenship. Some significant results are: the publication Gateway to Citizenship, which was revised in 1948 to include material that would be helpful in the preparation of "I Am An American Day", now "Citizenship Day", and other patriotic programs. Like the first edition, the publication was sent to all Judges of Naturalization Courts and is sent to all United States District Judges immediately after their appointment, and to all State Judges following their election to the bench, who hold naturalization proceedings. (Twenty-three percent of the naturalization hearings are held in the State Courts.)

The publication, Road to U.S.A. Citizenship, designed as an aid toward naturalization, was re-issued in a revised edition this fiscal year. During the year 24,500 copies of this book were furnished by Service Field officers to applicants for naturalization at the time of filing declarations of intention or petitions for naturalization.

The booklet, Welcome to U.S.A. Citizenship, with a distribution of 28,500 copies, was designed as a memento for new citizens on the occasion of their naturalization. Its inspirational value has been materially increased during the past year by an additional number of judges personally endorsing copies at the time the books are presented to new citizens.

Letter of Welcome to the newly arrived immigrant --The Commissioner of Immigration and Naturalization sends to the newly arrived immigrant his best wishes in a letter of welcome to the United States with which is enclosed the Alien Registration Receipt Card of the alien. This letter also contains information concerning the provisions of the law relating

to address reports and calls attention to the educational requirements of the naturalization laws and the availability in the public schools of classes for instruction in English and History and Government.

Citizenship Day.--By a Joint Resolution (Public Law 261, 82nd Congress), approved February 29, 1952, the celebration formerly designated "I Am An American Day" was changed to "Citizenship Day", and is to be celebrated on September 17 of each year, instead of the former date of the third Sunday in May.

Since citizenship and the Constitution are inseparable, it seemed appropriate that the Congress should establish "Citizenship Day" in commemoration of the signing of the Constitution on September 17, 1787. Observance of "Citizenship Day", on each September 17, will afford all citizens of the United States -- native-born and naturalized -- a golden opportunity to rededicate themselves to the ideals of our democracy.

National Conference on Citizenship.--Sponsored by the Department of Justice and the National Education Association, over 1000 public and private organizations have participated in the Conference since its initiation in 1946.

The objectives of the Conference are: "To re-examine the functions and duties of American citizenship in today's world. To assist in the development of more dynamic procedures for making citizenship more effective. To indicate the ways and means by which various organizations may contribute concretely to the development of a more active, alert, enlightened, conscientious, and progressive citizenry in our country."

The Immigration and Naturalization Service has actively participated in all the annual meetings of the conferences, and in the planning of its programs. At the recent Seventh Conference held in Washington, D.C., September 17, 1952, an outstanding and inspirational feature of the opening session was a naturalization hearing by the United States District Court in which 51 petitioners became citizens. The President of the United States, the Attorney General and the Commissioner of Immigration and Naturalization were among those who addressed the new citizens.

The Service again provided an exhibit which not only displayed the various parts of the Federal Textbook and graphically outlined the work accomplished during the previous year, but centered around a moving picture entitled "Twentieth Century Pilgrim", shown on a continuous projecting machine installed as a part of the display itself.

This movie, produced and directed by the Service, outlines the naturalization process in the United States, following an "alien" from his landing to the oath-taking at a final naturalization hearing in a Naturalization Court. Copies of the film are available upon request for loan to civic, patriotic, and other groups interested in furthering the cause of good citizenship. The film is also available for telecasting.

STATISTICS

INFORMATION AND

INSTRUCTIONS

To keep the employees of the Service and the interested public informed of the work of the Service in terms of statistics, policies and procedures, is one of the important by-products of the responsibility for enforcing immigration and nationality laws.

Statistics

Publications.--During the year the analyses of recent naturalizations were continued. Articles were published in the Monthly Review on the social characteristics of nationals of Mexico and Norway. Two reports were prepared relating to the United Nations statistical program, one on international definitions to be used in reporting migration statistics, and a second in reply to a questionnaire relating to the suppression of traffic in persons, and of the exploitation of the prostitution of others. A study of international overseas travel was republished, in whole or in part, by travel magazines and newspapers.

Statistical Analysis.--As in years past, immigration and nationality statistics have been collected, presented, analyzed, and interpreted during the fiscal year covering data on migration, including agricultural laborers, naturalization, derivative citizenship, expatriation, repatriation, exclusion of inadmissible aliens, the apprehension and deportation of aliens illegally in the United States, and data on the adjudicative functions delegated to the Service by law and regulations. Detailed tables on displaced persons admitted under the Displaced Persons Act of 1948, have been prepared on a monthly basis for the Displaced Persons Commission, and special tables have been prepared semi-annually on the displaced persons already in this country. Current statistics have been published periodically in the Monthly Review.

Field Operations Reports.--Operations reports from the field

and statistical analyses have proven of increasing value in the study and determination of administrative procedures and policies of the Service.

Alien Address Report.---The annual Alien Address Report, required by the Internal Security Act, formed the basis for a series of tables on the residence and nationality of alien residents.

Other Reports.---Other statistical work in the past year included articles for 17 standard reference yearbooks, material for talks by the Commissioner, and analyses of procedural changes. From the passenger manifests the Service published, monthly, a series of tables on air and sea travel that form the basic data for much of the travel analysis made by other agencies.

This Annual Report, insofar as it reflects the statistics of the Service, and the tables that follow, is part of the statistics program of the Service.

Information

The Monthly Review, published under authority of Sec 327(c), Nationality Act of 1940, as amended, presented articles of current and lasting interest concerning the Service program. Articles interpreting new legislation and its effort on the Service program, research into the meaning of the statistics of the Service, the operation of inspection as carried on at various ports, and other articles of wide variety, most of them written by members of the Service staff, have been published in the Monthly Review during this and previous years.

During its lifetime, beginning in 1943, the Monthly Review has had six Service Editors. Publication was suspended only once for the months of March, April, May and June of 1948 -- a period which saw the removal of the Central Office of the Service from Philadelphia, Pennsylvania, to Washington, D. C.

The June 1952 issue of the Review announced that, in accordance with a ruling of the Bureau of the Budget, its publication ceased with that issue. However, a periodical, The I. and N. Reporter, will be published quarterly after June 30, 1952.

The INS Bulletin is a weekly newsletter which keeps the officer personnel of the Service informed of events and substantive material that is of immediate interest to them.

Inquiries keep phones ringing and typewriters clattering as aliens and citizens alike, seek to know. How to become a citizen, how to file an immigration visa to bring an alien parent into the United States, all about Italian (or Mexican, or Canadian) immigration for the past 100 years; the date of naturalization of a parent; and various other items of interest.

During the fiscal year 1952, 57,070 letters of inquiry were answered by the Central Office Information Section, while 162,994 oral inquiries were handled.

In the wider field of public relations, great interest has been shown in the Service, and the mass media of news releases, radio, television, motion pictures, and magazine articles were used throughout the year to keep the public informed of the Service work and the reasons for the administrative actions taken.

Instructions

Digests and Manuals ---There were 1,641 manuscript pages of new and revised text prepared for publication in manuals. These mainly were for the Nationality and Immigration Manuals, the analytical work-books of some 2,200 printed loose-leaf pages that concisely state the substantive and procedural law from all sources on those subjects. Additionally, in the interest of accurate public information, private publishers were assisted in bringing to date the legal information for a number of yearbook articles on nationality and immigration.

In connection with the manuals and the digest functions, 18,578 administrative and judicial decisions or opinions were examined. From these 1,445 digests were prepared, indexed, and entered into the Index Digest, an exhaustive collection of precedents that envisages the assembly behind specific fundamental titles of the substantive and procedural law from all sources.

Other related duties included providing the Secretary of Defense, both in technical and nontechnical form, with statements of the current laws and regulations as to naturalization benefits based on service in the armed forces of the United States, and the daily digesting for the Service of the Congressional Record, preparation of correspondence and answers to technical inquiries, and 1,964 personal consultations with representatives of this Service and other agencies on subjects covered by the Manuals and Index Digest.

Regulations and Instructions ---Numerous regulations implementing existing as well as newly enacted legislation for inclusion in Title 8 of the Code of Federal Regulations were drafted. Because of the additional functions that were decentralized to the field offices, there were also prepared new and amended operations instructions for the internal guidance of Service personnel to better effect the uniform and efficient administration of the immigration and nationality laws.

A reorganization of the Central Office was formally approved during the latter part of the fiscal year. Similar action will be taken with respect to the Field Service during the ensuing fiscal year. The new organization has been planned to give greater efficiency in operation based on experience since the passage of the Internal Security Act of 1950, and in anticipation of changes to arise from the newly enacted Immigration and Nationality Act which becomes effective in December 1952.

Personnel

One major phase of the reorganization was the separation of the Personnel Office from the Administrative Division and its transfer to the Office of the Deputy Commissioner.

With the termination of the Displaced Persons Program, practically all of the employees assigned to Germany to assist the Displaced Persons Commission had been recalled to the United States by the last of the year. During the year the Service arranged to take jurisdiction over enforcement of the immigration and nationality laws on the Island of Guam and a small office was opened in Mexico City, Mexico.

On June 30, 1952, the Immigration and Naturalization Service consisted of 7,324 employees. There were 877 in the Central Office and 6,447 in the field. The latter group includes 115 employees stationed in Alaska, Guam, Hawaii, Puerto Rico, and the Virgin Islands of the United States and 75 located in Canada, Cuba, and Mexico.

Placement and Training.—Approximately 10,800 personnel actions of all types were processed during the year; 7,700 concerned the Field

Service and 3,100 the Central Office.

In the Central Office approximately 6,200 interviews were conducted and 4,7000 letters and memoranda were prepared in connection with placement activities.

The Board of U.S. Civil Service Examiners for the Immigration and Naturalization Service received and processed applications for examinations for the positions of Patrol Inspector (Trainee) and Immigrant Inspector as follows:

Applications Received.....	7,228
Applications on hand at end of preceding fiscal year.	1,137
Applications rated.....	7,393
Placements.....	348

The two correspondence training programs were continued during the year. Twenty-seven lessons were in circulation in the general program on immigration and nationality law. All of these lessons must be withdrawn and replaced during the forthcoming fiscal year to conform with the changes arising from Public Law 414 and the regulations to be issued thereunder. Enrollees in this program completed 1,688 lessons. In addition, 6,053 lessons were completed by enrollees in the course of study for probationary patrol inspectors consisting of 11 law lessons and 15 Spanish lessons and a diagnostic test in each.

Twenty-nine new tests in law and Spanish were devised during the year for use in examining probationary patrol inspectors. A total of 1,047 tests were furnished to field offices. Two tests were devised in connection with the establishment of promotion registers for the position of Senior Patrol Inspector. Three hundred and eleven of these tests were furnished to field offices.

Three resident school sessions were conducted for a total of 103 investigators and hearing officers who received instruction in the laws, procedures and methods.

Special training programs were conducted for nine representatives of foreign governments during the year.

Classification and Employee Services.—During the year classification surveys were conducted which resulted in the establishment of the new field positions of Adjudicator and Examining Officer and the reallocations of those investigators engaged in the more difficult phases of investigative work and a number of positions of Chief, Investigations Section in the various districts. A comprehensive study was made of the duties and responsibilities of Detention Officers and action was initiated toward the close of the year toward the allocation of these positions. Cooperation was given to representatives of the Civil Service Commission in an extensive study of

Immigrant Inspector positions throughout the Service. It is expected that classification standards covering these positions will be published in the near future.

Thirty-five hundred positions were reviewed during the year. Approximately 900 position descriptions were written or reviewed and allocated; of these, 215 involved Central Office positions, 145 of which arose from the reorganization program.

Over 17,000 treatments were given by the Health Unit during the fiscal year. Approximately 6,000 sick leave applications were processed by the nurses. Seven hundred and thirty-four character and loyalty investigation reports were processed; 39 disciplinary cases were adjudicated and appropriate action taken; fifty-one applications were processed for retirement under Public Law 879; and over 1,600 employee service interviews were conducted.

Participation by employees in Group Hospitalization and Federal Credit Union continued to be active during the year.

Finance

General.--During the fiscal year 1952, the Finance Branch of the Administrative Division accomplished two major objectives in fulfilling its responsibility under the Accounting and Procedures Act of 1950 to establish and maintain an adequate and complete accounting system.

The first step was the installation in September 1951, of an accounting system for reporting expenditures by activity. These activities are nine in number, namely, Inspection, Detention and Deportation, Naturalization, Border Patrol, Investigations, Alien Registration, Field Administrative Services, Executive Direction, and Central Administrative Services. This reporting process will give more appropriate support for the performance budget.

The second step was the preparation and distribution of an accounting manual prescribing a decentralized accounting system for the Service, effective July 1, 1952. The system is based on branch-office accounting methods, whereby each District Director is allotted funds on a quarterly and annual basis to operate his District. Under this system each district office will maintain its own accounting records and the Central Office will be advised as to the budgetary status of funds on a monthly report basis. Control accounts over the districts will be maintained in the Finance Branch in the Central Office.

The accomplishment of these two major objectives stems from the programs prescribed by the Congress through the Accounting Systems Division of the General Accounting Office. The Service has been commended by that Office for its steps forward in the accounting field. Future objectives are the installation of cost accounting

methods wherever appropriate and the commencement of an on-the-site audit of our accounting records by the General Accounting Office.

Extra Compensation under the Act of March 2, 1931 -- There were five accountings totaling \$1,612.71 certified to the Claims Division, General Accounting Office, for claims received in the Central Office. These claims were based on the decision rendered May 6, 1946, by the U. S. Court of Claims in the Renner and Krupp cases. The Court held that employees of this Service are entitled to extra compensation under the provisions of the Act of March 2, 1931, for overtime services performed on Sundays and holidays in connection with the examination and landing of passengers and crews arriving in the United States from a foreign port by water, land or air.

The General Accounting Office has advised this Service that settlements are being issued in the cases of the three claimants who were seeking extra compensation for overtime services performed as immigrant inspectors on week-days and for which extra compensation had not already been paid. These settlements issued on these cases covered extra compensation for overtime services rendered between 5.00 p.m. and 8.00 a.m., outside of the regular tour of duty pursuant to the provisions of the Act of March 2, 1931 (46 Stat. 1467).

There were approximately 40 claims received for extra compensation under the provisions of the Act of March 2, 1931, for duties performed as members of the Border Patrol of this Service. These claims were denied for payment and returned to the General Accounting Office as a result of the decision rendered by the U. S. Court of Claims on January 6, 1951, in the cases of Harry B. Greene, No. 4418, and Green L. Toney, No. 47511, in which the Court held that the plaintiffs, Greene and Toney, were not entitled to recover under the provisions of the Act of March 2, 1931 (46 Stat. 1467-1468), for duties performed by them while acting as members of the Border Patrol, immigrant and Naturalization Service.

There is still pending before the U. S. Court of Claims Petition No. 49879 filed October 23, 1950, by four employees of this Service seeking to enforce their demands that immigrant inspectors performing duties in a supervisory capacity are entitled to extra compensation under the provisions of the Act of March 2, 1931, for overtime services performed on Sundays and holidays.

There have been approximately 877 employees and former employees of this Service who have filed suits in the U. S. Court of Claims seeking to collect extra compensation under the provisions of the Act of March 2, 1931, for overtime services performed during fiscal year 1948. These suits are based on the decision rendered June 6, 1944, by the U. S. Court of Claims in the cases of Thomas G. Gbrey, No. 48572, Joseph M. Ahearn, No. 48610, and Donald M. Mayo, No. 48611. The resulting certification on similar suits filed in the Court of Claims total \$586,467.00, with Court of Claims judgments

in the amount of \$532,683.81 having been rendered in favor of 764 of the approximately 877 claimants who have filed suits in the Court of Claims.

A total of approximately 500 individual claims were processed during fiscal year 1952. Certifications in the total amount of \$80,539.15 were prepared for approximately 65 of these claims. The remaining claims were returned to the General Accounting Office without certifications, either as a result of a Court of Claims decision or because Service records did not reflect overtime services performed for which extra compensation was due under the provisions of the Act of March 2, 1931.

The table below gives a comparison of accountings certified under the May 6, 1946 precedent, both to the Court of Claims and the General Accounting Office.

Budget

A total appropriation of \$41,400,000 was made to the Service for the fiscal year 1952, an increase of \$7,000,000 over the amount available for the preceding year. The 1952 annual appropriation in the amount of \$36,400,000 was included in the Department of State, Justice, Commerce, and the Judiciary Appropriation Act, 1952 (Public Law 188, 82nd Congress, approved October 22, 1951). A supplemental amount of \$1,000,000 for inspection and processing of alien agricultural laborers and to remove illegal aliens to Mexico was included in the Supplemental Appropriation Act, 1952 (Public Law 253, 82nd Congress, approved November 1, 1951). A supplemental amount of \$1,390,000 to provide for establishing detention camps, strengthening the Border Patrol, and air removal of illegal aliens was included in the Third Supplemental Appropriation Act, 1952 (Public Law 375, 82nd Congress, approved June 5, 1952). Also included in the Third Supplemental Appropriation Act was the sum of \$2,610,000 to cover increased pay costs authorized by Public Law 201, 82nd Congress, approved October 24, 1951, increasing rates of compensation for employees of the Federal Government, effective July 8, 1951.

Pursuant to Public Law 233, 82nd Congress, approved October 20, 1951, annual leave was reduced from 26 days to 3 days for employees with less than three years service, and from 26 days to 20 days for employees with three, but less than 15 years of service. Theoretically, considering the distribution of Immigration and Naturalization Service employees according to length of service, the change in the annual leave law should result in an increase of approximately 1.8 percent in the amount of productive time. On this basis the Bureau of the Budget required that the Service cut back its average employment to a level equivalent to an annual saving of 141 positions.

Budgetary adjustments to meet special operational needs were somewhat hampered during the fiscal year by reason of a statutory limitation upon the amount available for personal services. Such a limitation was tantamount to operating two distinct appropriations, requiring special accounting and controls and at the same time restricting flexibility of administration. This defeated, in part, the improvement which accrued a few years ago when Congress saw fit to combine several appropriations into a single lump sum appropriation for all expenses of the Service.

By provision in Title V of the Independent Offices Appropriation Act, 1952 (Public Law 137, 82nd Congress, approved August 31, 1951), the Congress authorized the head of each Federal Agency to prescribe regulations covering fees, charges or prices for services, permits, etc., where such are not covered by existing statutes. Various Congressional Committee reports have stressed the importance of putting direct Government Services as nearly as possible on a fee basis adequate to cover the costs. Recommendations concerning the fixing of fees and charges were obtained from each District Director and Assistant Commissioner. Consideration of these recommendations

and the drafting of appropriate regulations were in progress at the close of the fiscal year.

The six months extension granted on June 28, 1951, upon certain provisions of the Displaced Persons Act of 1948, as amended, required revision of program and budget schedules to permit operation in anticipation of appropriation of supplemental funds consistent with the law's extension. Uncertainty as to availability of funds on this project continued throughout the year, requiring frequent reassessments of needs and justification therefor to the Displaced Persons Commission, the Bureau of the Budget and Congress.

Space, Services and Supplies

Space.--The need of suitable housing for our offices continues to be one of our most urgent requirements. In districts which have many small ports, adequate offices for border inspections and suitable living quarters for inspectors at isolated locations are urgently needed. Over 100 building projects to relieve space problems have been recommended to the General Services Administration, but such construction is dependent upon authorization by Congress. During the past year, the General Services Administration took over many leases covering space occupied by this Service.

A new suboffice was established at Billings, Montana.

After several years of negotiations, a privately-owned building is being erected at Pigeon River, Minnesota, to house the inspectional activities of this Service and the Customs Service. The building is being occupied under a leasing arrangement. New quarters were constructed for the use of the Border Patrol at Baltimore, Maryland, which are leased to this Service.

Plans and specifications were prepared and a contract awarded for the erection of a 200-man detention facility at Chula Vista, California.

Office space in the Central Office was reassigned as a result of the reorganization program.

Services.--During the past year, an additional multilith machine was purchased for use in the Duplicating Unit. During the year a total of 15,883,815 sheets were duplicated.

Plate making equipment was purchased for the Photo Laboratory. This consists of a multilith camera, arc lamps, vacuum frame and whirler.

The program to convert many of the AM radio stations to FM was continued. Fourteen FM repeater stations have been installed or are in the process of being installed on mountain-top or high tower locations. Fifteen fixed stations, a few of which are in the installation stage, are being provided.

On June 25 1952, a contract was awarded for the elimination of fire hazards on Ellis Island.

Initial steps were taken to convert the electric power on Ellis Island from dc to ac current and to purchase the required electric power instead of generating it. This is a continuing program.

A Civil Defense program was inaugurated in the Central Office. Approximately 85 employees were trained as wardens and first-aid workers.

Equipment and Supplies.--During the fiscal year 1952 the activities of the Tabulating Unit reached a new peak. Approximately 13,000,000 punched cards were processed that related to the compiling of statistics on all types of aliens, the Files Decentralization Program, and the Accounting and Activity Pay Roll. Additional types of information emanating from punched cards during 1952 were Look-out Notices and Alien Travel Control, which resulted in a sharp rise in tabulating work.

The Internal Security Act of 1950 also placed upon the Tabulating Unit the responsibility of compiling several types of reports for the Immigration and Naturalization Service and other governmental intelligence agencies. This information was, and is, obtained from approximately 2,300,000 cards.

During the past fiscal year purchase orders were issued for two hundred and eleven passenger carrying vehicles. These included passenger cars, busses, and station wagons. Of this number, 150 represented replacements. Also during the year, seventy-five trucks were purchased of which 28 were replacements.

A 40-foot boat was purchased during the year. This will be used for patrol work off the Florida coast.

Management Improvement Program

Forms Control.--The Forms Control Program which is now in its second year of operation represents an effective management tool to eliminate duplication of effort and to keep man power requirements to a minimum where necessary records must be created and processed. The Forms Control Program provides for improvement in forms design, consolidation or elimination of overlapping forms, standardization of format and wording, and clearance with the Bureau of the Budget when required.

During the latter part of fiscal year 1952, the Forms Program was extended to include forms used primarily at district level. An analysis is presently underway to standardize district forms and to eliminate unnecessary forms. All districts have forwarded copies of forms designed and reproduced locally for analysis.

Seven hundred and sixty-eight forms were reviewed during the fiscal year. Of these, 100 were new forms, 171 were forms requiring revision, and 448 were approved for reprint without change, 49 forms were eliminated. Seventy-one of the forms approved required Bureau of the Budget approval.

Administrative Manual and Other Administrative Releases.--During the year there were released 13 Administrative Manual Transmittal Memos, encompassing 149 new and revised pages of instruction and 42 exhibits. Four revision sheets requiring pen and ink insertions and changes were also released. Among the releases were new instructions for executing contracts, revised filing procedures, institution of a comprehensive motor vehicle expense and maintenance program, the institution of various statistical reports, instructions for the use of Government property and records, and disposal schedules for certain files and other miscellaneous instructions. Several new series of code words and a number of revisions were devised and released as a part of the Telegraphic Code. Work was continued in bringing up to date the numbered releases known as the Central Office Memo Series which necessitated the revision and elimination of much of the obsolete material.

Review of Service Reports.--At the suggestion of the District Directors Conference, a committee was established to analyze and review the operating reports presently being received by the Service. The committee found a lack of a centralized control in the Central Office for the reports requested from the districts. This led to duplication of items in reports received by different operating divisions in the Central Office and in the failure on the part of the operating divisions to use data already available in the Central Office. It was found too, that there was a tendency to continue indefinitely a report which was requested for a particular purpose and for which purpose the report was no longer required. As a result of the survey 37 of the 94 reports being received in the Central Office were discontinued, 19 reports were revised and 38 reports were continued in their present status. The committee also recommended the establishment of a permanent Central Office control of reports. The control requires the designation of a Reports Control Officer by whom all new reports must be approved and the establishment of a permanent committee to give periodical review to all outstanding reports.

Work Measurement.--The work measurement reporting system, which has been in effect since 1947, required complete revision. After review by Central Office representatives and the field offices, a draft was drawn up which served as a working basis for the reports committee work. The committee established the principle that the work measurement system was the basic operating work report for the Service. All other reports were to supplement this report on a more or less temporary basis.

Survey of Lookout System.--A survey of the lookout system of 3" x 5" cards listing the name and identifying information for those

aliens whose admission or departure the Service desired to prevent because of criminal, narcotic, subversive, etc. charges, revealed the fact that the system was cumbersome and inefficient.

The objective of the survey was to develop a better lookout system which would provide each Immigrant Inspector with a complete, portable, and readily accessible list of aliens on whom the Service had issued lookouts.

The system devised places all information concerning "lookouts" into a portable loose-leaf book, which is kept current through the use of tabulating and photographic equipment.

The advantages are. (1) An Immigrant Inspector can carry with him a list of all names of aliens on whom the Service has "lookouts" in loose leaf form. This will enable the Inspector to make a quicker and more certain identification of inadmissible aliens. (2) It makes it possible for the Inspector to render quicker service to the public. (3) The mechanical means of reproducing the lookout notices is economical in terms of time and personnel.

Motor Vehicle Program. --Prior to this fiscal year, the Service did not have a formal automotive maintenance program. Procedures have now been developed to furnish complete accounting data relating to the automobiles in the Service fleet. These procedures together with others which had been developed as a part of the Motor Vehicle Management Program will insure that proper preventive maintenance measures are being observed; that operating supplies such as gasoline and oil are being procured at lowest cost, that ordinary maintenance and repairs are effected with a maximum of efficiency and economy, and that manpower engaged in the automotive program is producing fully with respect to both quality and quantity. Detailed instructions and relating forms have been reproduced, distributed and will become effective with the month of July.

Warrant Docket Control. --During the latter part of the fiscal year 1952, a procedure for a uniform control of Warrant of Arrest cases was prepared. The procedure provides that complete information will be available on all warrant cases from the time the Warrant of Arrest is issued until such time as the case is concluded. The 16 district offices of the Service will maintain a district control over the progress of each individual case in their district while the Central Office will be provided with a quantitative control over all Warrant of Arrest cases in process. Control is maintained through the use of a Service-wide standard multi-copy form. The original copy becomes the Master District Control Record and the first carbon copy is sent to the Central Office as the initial report. The original copy is maintained at district level in the visible index system (alphabetical).

The remaining copies are used for reporting subsequent actions. When deportation or other final action has occurred, the original

Master District Control Record is forwarded to the Central Office. Where the final action results in the expulsion of the alien, the original copy of Control Form is cut to 3" x 5" card size in the Central Office and sent to the State Department as their record of the case.

The proposed system which will be installed during the first part of fiscal year 1953, will provide 100 percent coverage control of warrant cases. In the past, such control has never been extended to all cases and has been maintained on individual district basis. The procedure also will eliminate the use of certain reports now required to be forwarded to the Central Office on selective types of cases.

Microfilm Program.--a. Naturalization Certificate Files.--The microfilming of the Naturalization Certificate Files was initiated at the beginning of the fiscal year. Approximately 20,000,000 exposures were completed during the year with the result that approximately 5,200,000 of the 6,500,000 naturalization files scheduled for microfilming were photographed.

The microfilming of the Naturalization Certificate Files is considered as a major step in combating the increasing volume of Service files which present housing and maintenance problems. Also the filming of these records provides security thereby eliminating the possibility that the records might be destroyed by fire or other catastrophe. The remaining Naturalization Certificate Files will be microfilmed during the first half of fiscal year 1953. When completed all naturalization documents, with the exception of the normal accumulation required for operating purposes, will be on film. This program integrates the microfilm operation into the regular files program of the Service. When completed, approximately 12,000 square feet of floor space will be released for more urgent needs. The microfilm file requires only several hundred square feet of floor space for its operation.

b. Service-wide Microfilm Program.--The Service completed a survey of records adaptable to microfilm and has made recommendations concerning the installation and operation of such a program. This program, which is Service-wide, will involve the microfilming of approximately 6,000,000 manifest records at the various ports, 4,000,000 non-immigrant visas housed in the Central Office, and 11,000,000 land border port manifests. In addition, the Service is proposing the microfilming for security purposes, the Alien Index, the Naturalization Index and the Visa Index in the Central Office.

The program, which has now been forwarded to National Archives for review, will bring current the microfilming of manifest records at the ports. The microfilming of manifests was initiated in 1944 and to date work on this phase of microfilming has gone forward in five of the Service's 16 districts. When completed all passenger manifests up to 1948 will be on microfilm, while all crew manifests

up to the present date will be photographed. For the period following 1948, it has been decided that the passenger manifests are a records disposal program problem rather than one for microfilming.

Alien Address Report Program.--The Internal Security Act of 1950 requires that each alien resident in the United States on January 1 of each year report his address within 30 days of that date to the Commissioner of the Immigration and Naturalization Service. When the reporting system was initiated in 1951, the punched card equipment was selected as the means of processing and tabulating the reports. From experience gained during the initial report in January 1951, modifications were made in the system to the extent that tabulating procedures were shortened and at the same time a more positive control over the individual reports was established. In addition, a major operation carried forward in 1951 was eliminated -- that of filing the actual reports in the individual aliens' files. Under the 1952 program the reports are to be placed in numerical sequence and microfilmed. This change in procedure eliminates a large-scale filing operation and at the same time creates a single centralized record for reports submitted in any single reporting year.

By the end of June 1952, approximately 2,125,000 reports had been received for the reporting year 1952. Punched cards had been prepared from which lists containing the names and addresses of aliens by a specified nationality or geographic location could be prepared at immediate notice. This "security deck" is available to furnish such information to other Government agencies should the need arise.

Decentralization.--The procedure for decentralization of files is under constant review and refinement. During the year an additional means of activating files for decentralization was added to current procedure. The address reports submitted by aliens during January of each year will be used to supplement the normal decentralization requests received from the districts. The address reports which contain the current address of the alien are used on a selective basis to build up the decentralization rates for the districts. During the last quarter of fiscal year 1952, approximately 105,000 files were decentralized through the use of the address reports.

Work Simplification.--Work on analysis charts covering selective field operations was continued during the year. Also, similar charts were prepared for Central Office operations. These charts have been used by Central Office officials and district officials as guides in establishing uniform and standardized procedures. The charts have proved particularly helpful in simplifying and unifying files operations and warrant processing. It is the objective of the Service to have such charts established for all major operations and available for immediate use by all authorized personnel.

Service Suggestion System.--The Service Suggestion System which

was revitalized in fiscal year 1951 continued at a rapid pace. Suggestions from the field are first reviewed by the District Suggestion Committee for approval or disapproval. The suggestions are then forwarded to the Central Office for action by a committee composed of top level officials. Those suggestions involving monetary awards are further cleared through the Departmental Committee. At the beginning of the year 104 suggestions were on hand for action before the Central Office Committee. An additional 90 were received during the fiscal year. The committee acted on a total of 153 suggestions during the year. Of this number, 16 were adopted; four of the 16 were recommended for cash awards. During the latter part of fiscal year 1952 a publicity campaign was initiated for the Service Suggestion Program. Posters for bulletin boards were made available to all offices of the Service.

Records Administration

The most important accomplishment during the year affecting records administration was the adoption of a new procedure for Service files, providing that all Service files for aliens opened in the future will bear either an "A", "V" or "T" number, depending on the status of the subject. The system is designed to meet the requirements of the new Immigration and Nationality Act concerning a central index of all aliens admitted to or excluded from the country. It also provides for the disposition of the various types of files to be created, and constitutes in substance the records control schedule required by GSA Regulations 3-IV-101.03.

The Service during the year had additional disposal lists and schedules approved by Congress, and made excellent progress in the disposition of inactive records. Several districts were able to dispose of all records for which disposal authority had been obtained, and in each case reported increased efficiency in operations. Practically all districts made substantial progress in their records retirement programs, and 15,947 cubic feet of record and non-record material were disposed of in the field during the fiscal year. The Central Office disposed of 1,971 cubic feet. Before the close of the year, certificate files through number 5,259,999 had been micro-filmed, but the paper had not been destroyed. Four freight cars have been loaded and shipped since that time.

The decentralization of "A" files has progressed satisfactorily, and during the last three months of the year funds were available to double the rate of decentralization, using address report cards as activators in addition to new visas, requests from the field and change of address reports. During the year 587,330 files were decentralized, making a total since March 1, 1950 of 1,303,412. The activating media for decentralization are distributed as follows:

New visas.....	518,801
Requests from field..	623,696
Change of address....	56,039
Address reports.....	104,876

APPENDIX I

JUDICIAL OPINIONS IN LITIGATION AFFECTING THE SERVICE ANNOUNCED DURING THE FISCAL YEAR. (ONLY OPINIONS PRINTED IN THE PUBLISHED REPORTS ARE LISTED. THERE ARE ALSO NUMEROUS UNREPORTED DECISIONS).

UNITED STATES COURTS OF APPEALS

United States v. Sineiro, 190 F. 2d (C.A. 3); United States v. Yin Liu, 190 F. 2d 400 (C.A. 2); Kawakita v. United States, 190 F. 2d 506 (C.A. 9); U.S. ex rel. Rubio v. Jordan, 190 F. 2d 573 (C.A. 7); Stevens v. United States, 190 F. 2d 880 (C.A. 7); Acheson v. Kuniyuki, 190 F. 2d 897 (C.A. 9); Paiz-Nunez v. United States, 191 F. 2d 146 (C.A. 9); Zimmer v. Acheson, 191 F. 2d 209 (C.A. 10); U. S. ex rel. Adamantides v. Neelly, 191 F. 2d 997 (C.A. 7); D'Aquino v. United States, 192 F. 2d 338 (C.A. 9); Sepulveda v. Squier, 192 F. 2d 796 (C.A. 9); U.S. ex rel. Kwong Hai Chew v. Colding, 192 F. 2d 1009 (C.A. 2); United States v. Jen Foon, 193 F. 2d 117 (C.A. 8); United States v. Sineiro, 193 F. 2d 136 (C.A. 3); Machado v. McGrath, 193 F. 2d 706 (C.A. D.C.); Mandoli v. Acheson, 193 F. 2d 920 (C.A. D.C.); United States v. Kwan Shun Yue, 194 F. 2d 225 (C.A. 9); Krausse v. United States, 194 F. 2d 440 (C.A. 2); U.S. ex rel. Young v. Shaughnessy, 194 F. 2d 474 (C.A. 2); Revedin v. Acheson, 194 F. 2d 482 (C.A. 2); U. S. ex rel. Kustas v. Williams, 194 F. 2d 642 (C.A. 2); Sohaiby v. Savoretti, 195 F. 2d 139 (C.A. 5); Segreti v. Acheson, 195 F. 2d 205 (C.A. D.C.); United States Lines Co. v. Shaughnessy, 195 F. 2d 385 (C.A. 2); Andou-lapos v. Johnson, 195 F. 2d 444 (C.A. 4); Kokoris v. Johnson, 195 F. 2d 518 (C.A. 4); Acheson v. Albert, 195 F. 2d 573 (C.A. D.C.); Bogiatzis v. Hall, 195 F. 2d 661 (C.A. 4); United States v. Lutwack, 195 F. 2d 748 (C.A. 7); U.S. ex rel. Mezei v. Shaughnessy, 195 F. 2d 964 (C.A. 2); Sardo v. McGrath, 196 F. 2d 20 (C.A. D.C.); Wong Wing Foo v. McGrath, 196 F. 2d 120 (C.A. 9); Miranda v. United States, 196 F. 2d 408 (C.A. 9); Bisceglia v. Acheson, 196 F. 2d 865 (C.A. D.C.); Acheson v. Wohlmuth, 196 F. 2d 866 (C.A. D.C.); U. S. ex rel. Catalano v. Shaughnessy, 197 F. 2d 65 (C.A. 2); Kelly v. United States, 197 F. 2d 162 (C.A. 5); Martinez v. Neelly, 197 F. 2d 462 (C.A. 7).

UNITED STATES DISTRICT COURTS

Lum Man Sing v. Acheson, 98 F. Supp. 777 (D Hawaii); U. S. ex rel. Bittelman v. District Director, 99 F. Supp. 306 (SD NY); Okimura v. Acheson, 99 F. Supp. 587 (D Hawaii); Murata v. Acheson, 99 F. Students.....	11,914	10,481	9,744	7,355	8,613
Other nonimmigrants.....	273	32	5	50	44

1/ An immigrant is defined in statistics of the Service as an alien admitted for permanent residence, or as an addition to the population. Therefore, students who are admitted for temporary periods and returning resident aliens who have once been counted as immigrants are included with nonimmigrants, although Section 4 defines such classes as immigrants.

TABLE 4. IMMIGRATION BY COUNTRY, FOR DECADES:
1820 to 1952 1/

From 1820 to 1867 figures represent alien passengers arrived; 1868 to 1891 inclusive and 1895 to 1897 inclusive immigrant aliens arrived; 1892 to 1894 inclusive and from 1898 to present time immigrant aliens admitted. Data for years prior to 1906 relate to country whence alien came; thereafter to country of last permanent residence. Because of changes in boundaries and changes in lists of countries, data for certain countries are not comparable throughout.⁷

Africa.....	6,286	1,750	7,367	845	931	35,203
Australia and New Zealand...	8,299	2,231	13,805	490	545	69,372
Pacific Islands <u>15/</u>	427	780	5,437	3,265	33	19,880
Not specified <u>14/</u>	228	-	142	20	8	254,236

- 1/ Data are for fiscal years ended June 30, except 1820 to 1831 inclusive and 1844 to 1849 inclusive fiscal years ended Sept. 30; 1833 to 1842 inclusive and 1851 to 1867 inclusive years ended Dec. 31; 1832 covers 15 months ended Dec. 31; 1843 nine months ended Sept. 30; 1850 fifteen months ended Dec. 31 and 1868 six months ended June 30.
- 2/ Data for Austria-Hungary were not reported until 1861. Austria and Hungary have been recorded separately since 1905. In the years 1938 to 1945 inclusive Austria was included with Germany.
- 3/ United Kingdom not specified. In the years 1901 to 1951, included in other Europe.
- 4/ From 1820 to 1868 the figures for Norway and Sweden were combined.
- 5/ Poland was recorded as a separate country from 1820 to 1898 and since 1920. Between 1899 and 1919 Poland was included with Austria-Hungary, Germany, and Russia.
- 6/ Since 1931 the Russian Empire has been broken down into European Russia and Siberia or Asiatic Russia.
- 7/ No record of immigration from Japan until 1861.
- 8/ No record of immigration from Turkey in Asia until 1869.
- 9/ Prior to 1920 Canada and Newfoundland were recorded as British North America. From 1820 to 1898 the figures include all British North American possessions.
- 10/ No record of immigration from Mexico from 1886 to 1893.
- 11/ Bulgaria, Serbia, and Montenegro were first reported in 1899. Bulgaria has been reported separately since 1920 and in 1920 also a separate enumeration was made for the Kingdom of Serbs, Croats, and Slovenes. Since 1922 the Serb, Croat, and Slovene Kingdom has been recorded as Yugoslavia.
- 12/ Countries added to the list since the beginning of World War I are theretofore included with the countries to which they belonged. Figures are available since 1920 for Czechoslovakia and Finland; since 1924 for Albania, Estonia, Latvia, and Lithuania; and since 1925 for Luxembourg.
- 13/ No record of immigration from Rumania until 1880.
- 14/ The figure 33,523 in column headed 1901-1910, includes 32,897 persons returning in 1906 to their homes in the United States.
- 15/ In 1952 Asia includes the Philippines. From 1934 to 1951 the Philippines were included in the Pacific Islands. Prior to 1934 the Philippines were recorded in separate tables as insular travel.
- 16/ Included with countries not specified prior to 1925.

* Each entry of the same person counted separately.

** Includes arrivals by aircraft.

1/ Calais, Me. includes Halifax, Canada.

2/ Fort Fairfield, Me. includes Caribou Municipal Airport, Easton, Four Falls, and Knoxford Line, Me.

3/ Fort Kent, Me. includes Estcourt and St. Pamphile, Me.

4/ Houlton, Me. includes Bridgewater, Hodgdon, Littleton, Monticello, and Orient, Me.

TABLE 25. INWARD MOVEMENT OF ALIENS AND CITIZENS OVER INTERNATIONAL LAND BOUNDARIES,
BY STATE AND PORT: YEAR ENDED JUNE 30, 1952 (Cont'd)

Foot notes (Continued)

- 5/ Jackman, Me. includes Boundary Cottage, Corburn Gore, Dacquiam, and Lake Frontier, Me.
- 6/ Van Buren, Me. includes Hamlin and Limestone, Me.
- 7/ Vanceboro, Me. includes Forest City, Me., and St. John, New Brunswick.
- 8/ Port Huron, Mich. includes Algonac, Marine City, Marysville, Roberts Landing, and St. Clair, Mich.
- 9/ Duluth, Minn. includes Crane Lake and Winton, Minn.
- 10/ Noyes, Minn. includes Lancaster, Minn., Dunseith, Hannah, Hansboro, Maida, Neche, St. John, Sarles, and Walhalla, North Dak., and airports at Grand Forks and Pembina, North Dak.
- 11/ St. Paul, Minn. includes Fargo, North Dak. and Rochester, Minn.
- 12/ Sweetgrass, Mont. includes Del Bonita and Whitlash, Mont.
- 13/ Buffalo, N. Y. includes Rochester, N. Y., and Toronto, Canada.
- 14/ Malone, N. Y. includes Chateaugay, Fort Covington, and Trout River, N. Y.
- 15/ Niagara Falls, N. Y. includes Lewiston and Youngstown, N. Y.
- 16/ Ogdensburg, N. Y. includes Morristown and Waddington, N. Y., and Montreal, Canada.
- 17/ Roosevelttown, N. Y. includes Hogansburg and Massena Airport, N. Y.
- 18/ Rouses Point, N. Y. includes Cannons Corner, Champlain, and Moccers, N. Y.
- 19/ Syracuse, N. Y. includes Oswego, N. Y.
- 20/ Thousand Island Bridge, N. Y. includes Alexandria Bay, Clayton, Cape Vincent, and Watertown Municipal Airport, N. Y.
- 21/ Portal, North Dak. includes Ambrose, Antler, Carbury, Fortuna, Minot Airport, Noonan, Northgate, Sherwood, Westhope, North Dak., and Winnipeg, Canada.
- 22/ Cleveland, Ohio includes Akron and Youngstown, Ohio, and Erie, Penna.
- 23/ Toledo, Ohio includes Sandusky, Ohio.
- 24/ Highgate Springs, Vt. includes Alburg, Alburg Springs, and Morses Line, Vt.
- 25/ Newport, Vt. includes Baebé Plain, Derby Line, and North Troy, Vt.
- 26/ Norton, Vt. includes Canaan, Vt., and Connecticut Lakes, N. H.
- 27/ Richford, Vt. includes East Richford and West Berkshire, Vt.
- 28/ Bellingham, Wash. includes Victoria, Canada.
- 29/ Danville, Wash. includes Ferry, Wash.
- 30/ Seattle, Wash. includes Tacoma, Wash. and Vancouver, Canada.
- 31/ Milwaukee, Wisc. includes Green Bay, Wisc.
- 32/ Fabens, Tex. includes Fort Hancock, Tex.
- 33/ Hidalgo, Tex. includes Los Ebanos and Thayer, Tex.
- 34/ Rio Grande City, Tex. includes Roma, Tex.

TABLE 41. PETITIONS FOR NATURALIZATION DENIED, BY REASONS FOR DENIAL
YEARS ENDED JUNE 30, 1948 TO 1952

Reasons for denial	1948	1949	1950	1951	1952
Number denied.....	2,887	2,271	2,276	2,395	2,163
Petitioner failed to establish: Good moral character.....	304	233	139	105	90
That he is attached to the principles of the Constitution and well disposed to the good order and happiness of the United States.....	131	74	40	19	21
Knowledge and understanding of the principles of the Constitution 1/.....	37	78	151	219	105
Ability to speak the English language 2/.....	10	25	4	17	6
Racial eligibility to naturalization.....	3	-	1	1	1
Legal competency to take binding oath.....	-	-	3	1	1
Continuous legal residence in United States and/or State.....	18	21	20	14	15
That he is an alien, or national of the United States eligible for naturali- zation.....	43	36	38	45	25
Lawful admission for permanent residence.....	2	2	3	4	6
Petitioner failed to: Sign petition in own handwriting.....	6	1	1	5	8
Reside within jurisdiction of court.....	22	33	45	24	26
File valid certificate of arrival.....	8	2	1	5	2
File valid declaration of intention.....	16	28	16	15	19
Support petition by oral testimony of witnesses.....	-	1	2	1	4
Petitioner is an alien enemy not entitled to exemption.....	-	-	-	60	4
Petitioner withdrew petition.....	45	28	55	772	747
Petitioner failed to prosecute petition.....	1,936 3/	1,474 3/	1,537 2/	908	884
Petitioner died before petition disposed of.....	277	201	197	168	173
Other reasons.....	29	34	23	12	26

1/ In 1951 and 1952, knowledge and understanding of the fundamentals of the history, and the principles and form of Government of the United States.

2/ In 1951 and 1952, ability to speak, read, or write the English language.

3/ In most of these cases the petitioner failed to prosecute the petition for naturalization after notice that the petition would be recommended for denial on the merits of the case.
